Patel,1985-07-01 Montreal has had a longstanding interest in somatostatin Two years ago when the final planning began for the International Congress of Endocrinology in Quebec City in July 1984 we seized the opportunity for having a separate Satellite Symposium on somatostatin here in Montreal We felt that after a decade of uniformly vigorous growth in somatostatin research the opportune moment had arrived for a review of the most significant past developments and for setting the directions for the future Knowing the futility of trying to cover every aspect of the burgeoning somatostatin field in a two day scientific program we opted for a detailed analysis of selected areas which were reasonably mature and of areas of greatest new activity To attain these objectives 27 leading international experts actively involved in their fields were invited to present an in-depth review of their work in one of five major categories of somatostatin research Thirty minutes at the end of each session were assigned for a three way comprehensive discussion of some of the core concepts between the session moderators the panellists and the audience The feedback that we have received from the participants leaves little doubt that the meeting was a scientific and social success This book fulfills our final commitment towards the Meeting which
