Global Tuberculosis Control, 2010 Bulletin of the World Health Organization World Health Organization, 2008

Global Tuberculosis Control World Health Organization, 2006 This is the 10th WHO annual report on surveillance planning and financing for global tuberculosis control including data on case notifications and treatment outcomes from 200 national TB control programmes and an analysis of plans, budgets, expenditures and progress in DOTS (Directly Observed Therapy Short Course) strategies for 22 high burden countries. Eleven consecutive years of data are now available to assess progress towards the Millennium Development Goals targets for TB control. Findings include that in 2004 there were nine million new cases of TB and an estimated two million deaths from TB including those co-infected with HIV. The TB incidence rate was stable or falling in five out of six WHO regions with the number of cases rising in Africa where the TB epidemic is still driven by the spread of HIV. More than 80 per cent of all TB patients live in sub-Saharan Africa and Asia.

Crisis Preparedness Stella R. Quah, 2007 Throughout history nations have waged war against epidemics from bubonic plague to pulmonary tuberculosis. Today we confront HIV/AIDS, SARS and avian influenza among other major infectious diseases. Scientists around the world scrutinize viruses and bacteria more intently than ever. Yet while scientific advances are crucial they are insufficient. The world is not well prepared for the next health crisis. This timely book argues that the battle against infectious disease epidemics must be fought on two fronts. The first of course is the laboratory. The second is the wider social context that involves ordinary individuals and groups, legislators and the state. The failure to contain HIV/AIDS and the emergence of new infectious diseases highlight the inadequacies of current preventive and management approaches to deal with epidemics. The authors of *Crisis Preparedness* offer perspectives from social science, epidemiology and public health collectively seeking to answer the question: How can we prepare for the next global epidemic?

Measuring Effectiveness in Humanitarian and Development Aid Andre M. N. Renzaho, 2007 Donor countries are currently scaling up their aid programmes in response to strategies proposed through the Millennium Development Goals. Recent positive research on the impact of foreign development aid has led to increased expectations on the part of donor countries. Research suggests that per capita income growth over the last decade would have been lower in the absence of aid and also that public sector expenditure on health and education in developing countries would not have been as great without aid inflows. However, there still remain many significant gaps in knowledge on aid allocation and effectiveness. This book addresses a number of these gaps and provides many new and important analytical insights into aid. Among the topics covered are the interface between aid allocation and perceptions of aid effectiveness, the inter-recipient concentration of aid from non-government organizations, the year on year volatility of aid impacts of aid on public sector fiscal aggregates and evaluation of the country level impacts of aid. The book is an essential companion for

professionals engaged in aid policy reforms and also for scholars in the areas of development economics international finance and economics National Tuberculosis (TB) Monitoring & Evaluation Plan, 2009-2011 ,2009 Denver Journal of International Law and Policy ,2014 **The Atlas of Health** Diarmuid O'Donovan,2008 Winner of the BMA Board of Science Award for the Public Understanding of Science and the BMA Medical Book Award for Public Health This is a major new graphic profile of global health The atlas maps the causes and incidences of the major diseases as well as the economic social and environmental factors that impact on people s health worldwide Bringing together the latest data and charting recent trends in health and disease it also addresses how health needs are identified health policy is developed and the delivery and quality of health services The atlas covers a wide range of topics including life expectancy malnutrition and obesity water and sanitation cancer heart disease diabetes tobacco and alcohol migration and refugees climate change infectious diseases from malaria to HIV AIDS and tuberculosis mental health SARS avian flu and pandemic planning urbanization healthcare acquired infection and antibiotic resistance **Mergent International News Reports** ,2008 **The Third World in Social Science Perspective** ,2008 **Transactions** Biochemical Society (Great Britain),2008 **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events International Journal of Systematic and Evolutionary Microbiology ,2007
