**General comments**

This paper was taken by 1340 candidates. The mean score was 13.4 with a standard deviation of 4.9.

The intended facility of the items was 0.25 to 0.80. Five items proved to be too difficult. These were items 3, 14, 18, 19 and 22. However one item proved to be too easy. This was item 13.

There were five items where discrimination was below the design limit of 0.25. These were 6, 22, 25, 27 and 28. Other questions where a distracter was more popular than the key were 3, 7, 16, 19 and 30.

Areas of weakness in candidates' understanding were in inventory valuation under marginal and absorption costing and the application of ratios.

**Comments on individual questions**

Candidates found Item 3 to be challenging with over two thirds of candidates selecting one or other of the cash payments rather than splitting them to get the charge for the year.

In Items 6 and 7 more candidates chose one of the distracters than the key. In 6 they thought that a company would never be allowed to change a policy and in 7 failed to grasp from option C that the PLCA formed part of the double entry.

Item 13 was done exceptionally well although in Item 19 the majority of candidates thought that an increase in sales meant that the gross profit ratio would increase.

*Fulfilling Social and Economic Rights* Sakiko Fukuda-Parr, Terra Lawson-Remer, Susan Randolph, 2015 This book charts new territory in examining state performance in progressively realizing social and economic rights Developing a new measure the SERF Index and data set it provides a global picture of progress regress and disparities between and within countries explores factors influencing country performance and draws implications for the theory of progressive realization and state accountability [Climate Justice](#) T. Thorp, 2014-08-28 In this ground breaking work Teresa Thorp tackles the causes and effects of climate injustice by methodically mapping out an approach by which to reach a negotiated consensus with legal force to protect present and future generations Using the law and policy of climate change as a vehicle for illustrating how to shape our future she comprehensively overturns the widely held contemporary view of climate justice as inconstant charitable acts relative systemic notions and static concepts isolated from the common good and a congruent rule of law Responding to the adverse

impacts of climate change heat waves extended drought severe flooding and desertification which represent an urgent and potentially irreversible threat to human societies and the planet requires a new and cohesive way of thinking about global policy and the law. The mission of guaranteeing and realising human dignity, human security and human rights is multi fold. Looking through the lens of kaleidoscopic normativity an extensible language anchored in common juridical elements should facilitate how norms enter the socio legal frame and interact within it. Users need to be able to display and interpret the congruent legal norm in order to obey and apply it. Galvanising this process by constitutionalising first principles and consequential norms is vital for attaining fraternity between nations and among all people. *Climate Justice A Voice for the Future* is an essential read for scholars, practitioners and all those genuinely interested in reaching consensus on a post 2015 global climate accord a unified development agenda and a cohesive pact for disaster risk reduction. **The New York Times Index**, 2009
