Emanuel, 1991. Ezekiel Emanuel trained as both a physician and a political theorist. He rejects the claim that most of today's dilemmas of medical ethics are created by advances in medical technology. He maintains that the seemingly endless debates are the inevitable consequence of liberal political values. He proposes an alternative ideology: a liberal communitarianism that imagines a federation of political communities dedicated to democratic deliberations to guide the formulation of laws and policies. **The Heretic**, 1886 **To You**, 1956 *Healing with Art and Soul* Kathy Luethje, 2009. This fascinating collection of essays contains a variety of perspectives about the use of expressive arts for facilitating physical and emotional healing. Each author within brings a fresh approach and unique experiences to their writing. Within these pages, you will find many ideas for the use of the arts and can learn how to engage the inner layers of the self that allow natural healing processes of the body and soul to flourish. When we fully engage an art modality, we find ourselves in a place in our consciousness that could be called healingspace, where we feel ourselves whole and remember ourselves as well. From psychic trauma to physical illness, dis-ease of many kinds may be addressed through the various techniques discussed here. The tools offered by some authors are population-specific and age-appropriate, while several authors have given us the philosophical underpinnings for it all. While the authors within represent the grassroots voices of this new and rapidly expanding field, several of them have developed their own methods for using the arts and have thriving practices. Our approach is wholistic. Music, visual arts, movement, dance, and poetry are discussed as separate modalities and in combination with one another in a process or flow. The reader will engage in our experiences with these modalities as they have been lived. The complementary CD that accompanies this book will allow the listener to have a full sound experience of toning. If a rationale is needed for establishing arts programs in medical centers or other health facilities, it can be found here. The book offers tools for self-development and for group facilitation. Those wanting to expand their healing practice through the use of the arts will find the book to be a faithful guide. Anyone wishing for a fuller understanding of how the arts may work to facilitate healing will find much food for thought within these pages. **Public Hearing Before Assembly Health and Human Services Committee** New Jersey.
