## **The Crystal Sun:**

**The Crystal Sun** Robert Temple,2000 Archaeologists have always insisted most strenuously that lenses did not exist in ancient times Robert Temple s real life detective story proves them wrong His research began with the discovery that an ancient artifact in the British Museum believed to be a piece of rock crystal had in fact been ground to form a lens In this fascinating book one of the most revolutionary studies in the history of science and civilization to be published for decades Robert Temple reconstructs the story of light technology in ancient civilization Dating back at least to 2600 BC to Old Kingdom Egypt but unknown to modern archaeologists and historians a science of optics and a sophisticated technology for the manufacture of lenses was widespread and fundamental in ancient times It inspired awe in cultures who used it so became encoded in their mythologies and religions
