The Cuban Missile Crisis Flashpoints S:

The Four Flashpoints Brendan Taylor, 2018-08-06 A timely account of the four most troubled hotspots in the world's most combustible region Asia is at a dangerous moment China is rising fast and its regional ambitions are growing Reckless North Korean dictator Kim Jong un may be assembling more nuclear weapons despite diplomatic efforts to eradicate his arsenal Japan is building up its military throwing off constitutional constraints imposed after World War II The United States for so long a stabilising presence in Asia is behaving erratically Donald Trump is the first US president since the 1970s to break diplomatic protocol and speak with Taiwan and the first to threaten war with North Korea if denuclearisation does not occur The possibility of global catastrophe looms ever closer In this revelatory analysis geopolitical expert Brendan Taylor examines the four Asian flashpoints most likely to erupt in sudden and violent conflict the Korean Peninsula the East China Sea the South China Sea and Taiwan He sketches how clashes could play out in these global hotspots and argues that crisis can only be averted by understanding the complex relations between them Drawing on history in depth reports and his intimate observations of the region Taylor asks what the world's major powers can do to avoid an eruption of war and shows how Asia could change this otherwise disastrous trajectory *Roots of War and Terror* Anthony Stevens, 2005-06-20 This is an indispensable work for anyone wishing to understand the psychological basis of war and terror or hoping to discover ways in which the unimaginable catastrophe of nuclear or biological warfare may be averted **BOOK JACKET**

The Cuban Missile Crisis John Griffiths, 1986 **A History of Global Capitalism** Sambit Bhattacharyya, 2020-10-31 The book sets out to explore the economic motivations of imperial expansion under capitalism This undoubtedly is related to two fundamental research questions in economic sciences First what factors explain the divergence in living standards across countries under the capitalist economic system Second what ensures internal and external stability of the capitalist economic system The book adopts a unified approach to address these questions Using the standard growth model it shows that improvements in living standards are dependent on access to raw materials labour capital technology and perhaps most importantly economies of scale Empires ensure scale economy through guaranteed access to markets and raw materials The stability of the system depends on growth and distribution and it is not possible to have one without the other However the quest for growth and imperial expansion implies that one empire invariably comes into conflict with another This is perhaps the most unstable and potentially dangerous characteristic of the capitalist system Using extensive historical accounts the book shows that this inherent tension can be best managed by acknowledging mutual spheres of influence within the international system along the lines of the 1815 Vienna Congress This timely publication addresses not only students and scholars of economics geography political science and history but also general readers interested in a better understanding of economic development international relations and the history of global capitalism Flashpoint J.
