How Very Effective Primary Schools Work Chris James, Michael Connolly, Gerald Dunning, Tony Elliott, 2006-02-28 Chris James Michael Connolly Gerald Dunning and Tony Elliott have produced a comprehensive analysis of the very effective primary school Although the research for the book draws on the authors experiences in Welsh Primary Schools the range of literature cited and the analytical frameworks employed ensure that their findings have a much broader relevance They define a very effective school as one that provides high levels of attainment and rich educational experiences despite being located in extremely challenging circumstances A key insight of the book is that although these schools are consequently extraordinary their practice was in many ways quite ordinary This is because these schools worked in much the same way as the very best of schools have always done In many ways this is the authors note is an optimistic message that all children deserve to be educated in such very effective schools The virtue of *How Very Effective Primary Schools Work* is that it makes clear those characteristics and strategies that can help every school to become great David Hopkins HSBC iNet Chair of International Leadership and formerly Chief Adviser on School Standards to the Secretary of State 2002-2005 All children especially the poorest deserve capable, mature and well-adjusted teachers and leaders who work together to lay firm foundations of learning and behaviour then enrich and elevate everyone's learning far beyond that in optimistic cultures of security, persistence and hope Based on solid research from 18 outstanding schools in challenging circumstances this is the vital message of this important and unique book Chris James and his colleagues show that highly effective schools need high functioning adults and communities who expect and get the best from everyone dedicate themselves to others without burning themselves out are not frightened of challenges and contradictions stay around to fulfil their obligations to others and see their efforts bear fruit and are emotionally comfortable in their own skin If you want to become more effective as a school you will need to become more effective and adjusted as a teacher, a leader and an all round human being This inspiring and indispensable book will stir and steer all who read it in that educationally essential quest Andy Hargreaves Thomas More Brennan Chair in Education Boston College All good teachers and headteachers are concerned with improving pupil attainment In high attainment schools they must recognize how to sustain success In schools with low attainment levels they must come to understand the challenges they face and find ways of overcoming the difficulties This practical research based book describes the key approaches used by very effective schools The authors explain how success can be achieved and maintained and describe ways of working that bring about high levels of pupil attainment They also explain why these ways of working are successful This book is essential reading for headteachers, teachers, students of educational leadership and management, school governors and those who work in local authorities

Transforming Culture E. Briody, R. Trotter, T. Meerwarth, 2016-06-11 *Transforming Culture* offers a discussion and exploration of American work culture that can serve as a guide for organizational culture change through the description and explanation of a model for change used at GM. The book describes the model, discusses culture change tools that were derived from it and descriptions of how the tools work. **The Cultural Front** Michael Denning, 1998 As garment workers, longshoremen, autoworkers, sharecroppers and clerks took to the streets striking and organizing unions in the midst of the Depression, artists, writers and filmmakers joined the insurgent social movement by creating a cultural front. Disney cartoonists walked picket lines and Billie Holiday sang *Strange Fruit* at the left wing cabaret Caf Society. Duke Ellington produced a radical musical *Jump for Joy*. New York garment workers staged the legendary Broadway revue *Pins and Needles* and Orson Welles and his Mercury players took their labor operas and anti-fascist Shakespeare to Hollywood and made *Citizen Kane*. A major reassessment of US cultural history, *The Cultural Front* is a vivid mural of this extraordinary upheaval which reshaped American culture in the twentieth century. **The SAGE Encyclopedia of Theory in Psychology** Harold L. Miller, Jr., 2016-01-05 Drawing together a team of international scholars, *The SAGE Encyclopedia of Theory in Psychology* examines the contemporary landscape of all the key theories and theorists, presenting them in the context needed to understand their strengths and weaknesses. Key features include: approximately 300 signed entries fill two volumes. Entries are followed by Cross References and Further Readings. A Reader's Guide in the front matter groups entries thematically. A detailed Index and the Cross References provide for effective search and browse in the electronic version. Back matter includes a Chronology of theory within the field of psychology, a Master Bibliography and an annotated Resource Guide to classic books in this field, journals, associations and their websites. *The SAGE Encyclopedia of Theory in Psychology* is an exceptional and scholarly source for researching the theory of psychology, making it a must have reference for all academic libraries. **Culture, Biology, and Anthropological Demography** Eric Abella Roth, 2004-08-16 Two distinctive approaches to the study of human demography exist within anthropology today: anthropological demography and human evolutionary ecology. The first stresses the role of culture in determining population parameters while the second posits that demographic rates reflect adaptive behaviors that are the products of natural selection. Both sub-disciplines have achieved notable successes but each has ignored and been actively disdainful of the other. This text attempts a rapprochement of anthropological demography and human evolutionary ecology through recognition of common research topics and the construction of a broad theoretical framework incorporating both cultural and biological motivation. Both these approaches are utilized to search for demographic strategies in varied cultural and temporal contexts, ranging from African pastoralists through North American post-industrial societies. As such, this book is relevant to cultural and biological anthropologists, demographers, sociologists and historians. **Success with Flowers, a Floral Magazine**, 1898 **First Strike** Damien Michael Schnyder, 2009 My dissertation is an ethnographic analysis of a public high school in Southeast Los Angeles County. My

research analyzes three issues that make major contributions to issues of race and gender within anthropology First my ethnography examines the linkages between the prison and public education systems Second I argue that as a means to control the movement of black bodies on campus the public education system denies black students access to traditional spaces of black cultural autonomy Third I address the manner in which the public education system constructs and reinforces a particular type of deviant black masculinity with respect to black male youth Building upon the school to prison pipeline scholarship my dissertation examines the micro processes by which public education as a state structure facilitates the movement of black male bodies into the labyrinth of the prison system However departing from the body of literature I detail how the public education structure is an ideological and pragmatic extension of the organizational logic of prison
