## **The Cyrenean:**

Studies in the Reception of Pindar in Ptolemaic Poetry Alexandros Kampakoglou, 2019-08-05 Recent years have witnessed a revival of interest in the influence of archaic lyric poetry on Hellenistic poets. However, no study has yet examined the reception of Pindar, the most prominent of the lyric poets in the poetry of this period. This monograph is the first book to offer a systematic examination of the evidence for the reception of Pindar in the works of Callimachus of Cyrene, Theocritus of Syracuse, Apollonius of Rhodes and Posidippus of Pella. Through a series of case studies, it argues that Pindaric poetry exercised a considerable influence on a variety of Hellenistic genres: epinician elegies and epigrams, hymns, encomia and epic poetry. For the poets active at the courts of the first three Ptolemies, Pindar's poetry represented praise discourse in its most successful configuration. Imitating aspects of it, they lent their support to the ideological apparatus of Greco-Egyptian kingship, shaped the literary profile of Pindar for future generations of readers and defined their own role and place in Greek literary history. The discussion offered in this book suggests new insights into aspects of literary tradition, Ptolemaic patronage and Hellenistic poetics, placing Pindar's work at the very heart of an intricate nexus of political and poetic correspondences.

Despite plundering, these ornate structures reveal funerary competition, spatial organization and lost rituals. The book reconstructs the social history of ancient Cyreneans through their ostentatious funerary culture.

**Industrial Minerals** Patrick Degryse, Jan Elsen, 2003 This issue of *Aardkundige Mededelingen* deals with industrial minerals: their resources, characteristics, and applications. It is the result of an academic session on industrial minerals in honour of Prof. Dr. R. Ottenburgs. The contributions are organized according to five topics. In a first part, 'The Industrial Mineral World', some considerations on our natural resources, their use and political impact are presented. In a second part of the study, 'Aggregates and Natural Building Stone', a number of case studies on the use of industrial minerals as aggregate and ornamental or building stone are discussed. In a third part of the volume, 'Mortar, Cement and Concrete', the study of ancient mortars as well as exploratory research into new materials is illustrated. In a fourth session, 'Clays and Soils', environmental aspects of soils and the economical use of clay deposits are highlighted. In a fifth and final part of the book, 'Steel: the link between ores and
