examines the various contradictory tensions that democracy promotion produces in the context of an increasingly capitalist globalization of the world that has accelerated in the post Cold War period and into the 21st century According to the author the Cold War between the U S and the Soviet Union 1945 1991 brought the question of democracy to the forefront of modern political debate and the subsequent collapse of the Soviet model was in part a consequence of the U S projection of its own capitalist democracy as a model to be exported and emulated throughout the world Cavell argues the promise of democracy as an Enlightenment ideal has been to transcend the dichotomy of ruler and ruled by establishing self rule of the people themselves as the normative basis of governance in the modern world To the contrary the U S National Endowment for Democracy NED is promoting a market oriented democracy benefiting corporate interests which enhance U S economic and political hegemony     **Ancient Athens** Don Nardo, 2003 A historical look at ancient Athens and its people education weather transportation hotels shopping festivals sporting events banks government and sightseeing
