Wellman, 2014 Developmental psychologists coined the term theory of mind to describe how we understand our shifting mental states in daily life Over the past twenty years researchers have provided rich provocative data showing that from an early age children develop a sophisticated and consistent theory of mind by attributing their desires beliefs and emotions to themselves and to others Building on his pioneering research in *The Child's Theory of Mind* 1990 Henry M Wellman pulls together all that we have learned in the past twenty years to shine new light on how theory of mind develops *The Probabilistic Mind* Nick Chater, Mike Oaksford, 2008 *The Probabilistic Mind* is a follow up to the influential and highly cited *Rational Models of Cognition* OUP 1998 It brings together developments in understanding how and how far high level cognitive processes can be understood in rational terms and particularly using probabilistic Bayesian methods *Navigating the Social World* Mahzarin R. Banaji, Susan A. Gelman, 2013-03-26 *Navigating*

the social world requires sophisticated cognitive machinery that although present quite early in crude forms undergoes significant change across the lifespan This book will be the first to report on evidence that has accumulated on an unprecedented scale showing us what capacities for social cognition are present at birth and early in life and how these capacities develop through learning in the first years of life The volume will highlight what is known about the discoveries themselves but also what these discoveries imply about the nature of early social cognition and the methods that have allowed these discoveries what is known concerning the phylogeny and ontogeny of social cognition To capture the full depth and breadth of the exciting work that is blossoming on this topic in a manner that is accessible and engaging the editors invited 70 leading researchers to develop a short report of their work that would be written for a broad audience The purpose of this format was for each piece to focus on a single core message are babies aware of what is right and wrong why do children have the same implicit intergroup preferences that adults do what does language do to the building of category knowledge and so on The unique format and accessible writing style will be appealing to graduate students and researchers in cognitive psychology developmental psychology and social psychology
