Alan Holman, 2012 With its temperate climate and variety of habitats Michigan supports a diverse array of animals and plants including fifty four species of amphibians and reptiles The dispersal and biology of the Michigan herpetofauna amphibians and reptiles is even more unique because Michigan consists of two peninsulas that project into large freshwater seas and also because it was completely covered by a massive ice sheet a relatively short time ago In The Amphibians and Reptiles of Michigan A Quaternary and Recent Faunal Adventure author J Alan Holman explores the state s amphibians and reptiles in detail and with many helpful illustrations making this the only volume of its kind available Holman uniquely bridges the gap between

neo and paleoherpetology and shows that Michigan's modern herpetofaunas reflect Pleistocene ice age and Holocene warm period after the ice age events as the entire modern population was forced to re-invade the state after the last withdrawal of ice. In Part 1 Holman discusses Michigan as an amphibian and reptile habitat including a geological climatic and vegetational history. Part 2 presents recent species accounts covering all fifty-four species of amphibians and reptiles along with their general distribution, Michigan distribution with range maps, geographic variation, habitat and habits, reproduction and growth, diet, predation and defense, interaction with humans, behavioral characteristics, population health, and general remarks. In Part 3 Holman examines the Michigan herpetofauna in Quaternary and recent historical times, and the species accounts include Pleistocene, Holocene, and archaeological records. Color photographs of major herpetological habitats in Michigan are provided, and color photographs of all modern species are included. Black and white illustrations depict both modern and ancient species. Herpetologists, paleontologists, zoologists, ecologists, and general biologists, as well as anyone who loves salamanders, frogs, turtles, and snakes, will appreciate the comprehensive research presented in *The Amphibians and Reptiles of Michigan*.

Town Creek Indian Mound Joffre Lanning Coe, 2012-12-30 The temple mound and mortuary at Town Creek in Montgomery County is one of the few surviving earthen mounds built by prehistoric Native Americans in North Carolina. It has been recognized as an important archaeological site for almost sixty years and as a state historic site has become a popular destination for the public. This book is Joffre Coe's illustrated chronicle of the archaeological research conducted at Town Creek, a project with which Coe has been intimately involved for more than fifty years since its inception as a WPA program in 1937. Written for visitors as well as for scholars, *Town Creek Indian Mound* provides an overview of the site and the archaeological techniques pioneered there, surveys the history of the excavations, and features more than 200 photographs and maps. The book carefully reconstructs the archaeological record, including plant and animal remains, pottery sherds, stone tools, and clay ornaments. In a concluding interpretive section, Coe reflects on what Town Creek and its artifacts tell us about this prehistoric Native American society. Modeling Archaeological Site Burial in Southern Michigan G. William Monaghan, William A. Lovis, 2005 *Modeling Archaeological Site Burial in Southern Michigan* is the first volume in the Environmental Research Series. The product of more than two decades of research, it examines relationships between regional and local scale fluvial system evolution and the processes that result in the deep burial of archaeological sites, primarily in floodplain and coastal contexts. This multidisciplinary study incorporates findings from earth and social sciences, discussing regional scale processes of environmental change that are necessary to understand relationships between human economic needs, social adaptation, and

changing paleoenvironment Monaghan and Lovis have compiled and synthesized available data on deeply buried archaeological sites in southern Lower Michigan the result is the most comprehensive single compendium of such data available for any region of the Great Lakes Since the processes and contexts present in southern Lower Michigan are comparable to those in the larger region research modes presented here also have applicability across northeastern North America This is one of the most important pieces of research to be produced on Michigan archeology
