## **The Moral Ecology Of Markets:**

**The Moral Ecology of Markets** Daniel Finn, 2006-01-16 Disagreements about the morality of markets and about self interested behavior within markets run deep They arise from perspectives within economics and political philosophy that appear to have nothing in common In this book Daniel Finn provides a framework for understanding these conflicting points of view Recounting the arguments for and against markets and self interest he argues that every economy must address four fundamental problems allocation distribution scale and the quality of relations In addition every perspective on the morality of markets addresses explicitly or implicitly the economic political and cultural contexts of markets or what Finn terms the moral ecology of markets His book enables a dialogue among the various participants in the debate over justice in markets In this process Finn engages with major figures in political philosophy including John Rawls Robert Nozick and Michael Walzer as well as in economics notably Milton Friedman Friedrich Hayek and James Buchanan [The Moral Ecology of Markets](#) Daniel K. Finn, Daniel Rush Finn, 2006 In this process Finn engages with major figures in political philosophy including John Rawls Robert Nozick and Michael Walzer as well as in economics notably Milton Friedman Friedrich Hayek and James Buchanan [Markets and Other Social Structures](#) David M. Cloutier, Christina McRorie, 2025-11-21 This volume honors and examines Daniel Finn's transformative contributions to the field of Christian ethics In a career spanning nearly fifty years Finn became a preeminent thinker on Christian economic ethics and pioneered pathways of interdisciplinary engagement between theological ethics and the social sciences In this collection a wide range of scholars from several disciplines take up key themes from Finn's scholarship including the terms of the dialogue between economics and theology the importance of attending to a market's moral ecology when evaluating economic activity and the use of critical realism for theological reflections on structural sin and moral agency critically exploring and developing the relevance of these for social ethics and extending them to address new problems *Christian Economic Ethics* Daniel K. Finn, 2013-08-01 What does the history of Christian views of economic life mean for economic life in the twenty first century Here Daniel Finn reviews the insights provided by a large number of texts from the Bible and the early church to the Middle Ages and the Protestant Reformation to treatments of the subject in the last century Relying on both social science and theology Finn then turns to the implications of this history for economic life today Throughout the book invites the reader to engage the sources and to develop an answer to the volume's basic question **The Journal of Markets & Morality**, 2007 **The Moral Dynamics of Economic Life** Daniel K. Finn, 2012-05-31 Caritas in veritate Charity in Truth is the social encyclical of Pope Benedict XVI one of many papal encyclicals over the last 120 years that address economic life This volume based on discussions at a symposium co sponsored by the Institute for Advanced Catholic Studies and the Pontifical Council for Justice and Peace analyzes the situation of the Church and the theological basis for Benedict's thinking about the person community and the globalized economy The Moral Dynamics of Economic Life engages Benedict's analysis of relation the characteristics of

contemporary social and economic relationships and the implications of a relational Trinitarian God for daily human life. Crucial here is the Pope's notion of reciprocity: an economic relationship characterized by help freely given but which forms an expectation that the recipient will reciprocate either to the donor or often to someone else. This logic of gift, Benedict argues, should influence daily economic life especially within what he calls hybrid firms which make a profit and invest a share of that profit in service to needs outside the firm. Similarly, development, whether of an individual or of a nation, must be integral, neither simply economic nor personal nor psychological nor spiritual, but a comprehensive development that engages all dimensions of a flourishing human life. The essays written by social scientists, theologians, policy analysts, and others engage, extend, and critique Benedict's views on these issues as well as his call for deeper dialogue and a morally based transformation of social and economic structures. *Comptes Rendus Philosophiques*, 2007

**Catholic Moral Theology in the United States**  
Charles E. Curran, 2008. In this magisterial volume, Charles E. Curran surveys the historical development of Catholic moral theology in the United States from its 19th-century roots to the present day. He begins by tracing the development of pre-Vatican II moral theology that, with the exception of social ethics, had the limited purpose of training future confessors to know what actions are sinful and the degree of sinfulness. Curran then explores and illuminates the post-Vatican II era with chapters on the effect of the Council on the scope and substance of moral theology, the impact of *Humanae vitae*, Pope Paul VI's encyclical condemning artificial contraception, fundamental moral theology, sexuality and marriage, bioethics, and social ethics. Curran's perspective is unique. For nearly 50 years, he has been a major influence on the development of the field and has witnessed first-hand the dramatic increase in the number and diversity of moral theologians in the academy and the Church. No one is more qualified to write this first and only comprehensive history of Catholic moral theology in the United States.
