due diligence as a concept for enhancing accountability and compliance      Creating Knowledge over Distance Harald Bathelt, Sebastian Henn, 2025-06-04 Creating Knowledge over Distance shows that economic knowledge creation fundamentally depends on benefits from and is structured by temporary geographical proximity that is by economic actors meeting in person or interacting in a co present context to discuss business opportunities problems and solutions are face to face During the Covid 19 pandemic personal meetings often had to be reduced or were replaced by virtual meetings leading many observers to assume a fundamental reconfiguration of economic life in the future as face to face interaction may be substituted by virtual interaction through the use of new information and communication technologies While communication patterns certainly changed during this period this book demonstrates that the face to face meetings the authors investigate across a sequence of 11 chapters with different knowledge creation contexts are unlikely to be fully substituted by distant interactions and may even become more important over time The book develops the argument by systematically analyzing three configurations of knowledge transfers over distance 1 international community gatherings such as trade fairs delegation travel conventions and conferences 2 mobile business practices including intra firm business coordination inter firm projects producer user meetings and corporate expansions inter firm negotiations as well as 3 transnational networks related to transnational corporations and transnational migrant firms including new transnational firms new Argonauts and transnational family networks      Engineering and Mining Journal ,1898      Georgia Education Journal ... ,1927
