

The background is a dark green chalkboard filled with various mathematical sketches and formulas. In the top left, there is a coordinate system with x and y axes and a curve. To its right are the formulas a^2 and $\sin^2 \alpha + \cos^2 \alpha$. Below a^2 is the equation $2 \times 3 = 6$. In the center, a large, tilted abacus with colorful beads (orange, yellow, green, red) is visible. At the bottom, there are more formulas: $a^2 + b^2$, $\sqrt{2}$, and $2 + 2 = 4$, along with a sketch of a 3D pyramid.

How I Wish I Had Taught Maths: Reflections on research, conversations with experts, and 12 years of mistakes Craig Barton, 2018-01-01 I genuinely believe I have never taught mathematics better and my students have never learned more I just wish I had known all of this twelve years ago Craig Barton is one of the UK s most respected teachers of mathematics In his remarkable new book he explains how he has delved into the world of academic research and emerged with a range of simple practical effective strategies that anyone can employ to save time and energy and have a positive impact on the long term learning and enjoyment of students Craig presents the findings of over 100 books and research articles from the fields of Cognitive Science Memory Psychology and Behavioural Economics together with the conversations he has had with world renowned educational experts on his Mr Barton Maths Podcast and subsequent experiments with my students and colleagues

Mathematics Performance in Primary Schools Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2009 In 2007 08 the National Strategy to improve performance in primary mathematics cost some 104 million to implement The Strategy aims to raise performance through extensive teaching and learning resources supported by professional development programmes for teachers In 2006 07 some 2 3 billion was spent on teaching mathematics in

primary schools out of a total expenditure of 10 billion on primary teaching and teaching support staff Yet improvements in the mathematics results of primary school pupils have levelled off since 2000 In 2008 79 per cent of pupils met the Government's expected standard at Key Stage 2 age 11 This means that over one in five children are starting secondary school without a secure foundation in mathematics There are persistent gaps in the mathematics performance of primary school pupils from different backgrounds and with different characteristics In contrast to other subjects boys are making more progress than girls The biggest attainment gap 18 percentage points is related to deprivation Performance varies across England and between local authorities with the percentage of pupils achieving the expected standard at KS2 ranging from 70 to 87 per cent The Primary National Strategy has contributed to improvements in primary mathematics teaching and learning but weaknesses persist in vital areas such as the use and application of mathematics to real life situations and the assessment of pupils progress The lack of depth in subject knowledge of many primary school teachers and the lack of take up of continuing professional development in mathematics are major concerns which the Department has only recently begun to address through a ten year programme to train 13 000 specialist teachers

Taming Wild Extensions: Hopf Algebras and Local Galois Module Theory Lindsay Childs, 2000 This book studies Hopf algebras over valuation rings of local fields and their application to the theory of wildly ramified extensions of local fields The results not previously published in book form show that Hopf algebras play a natural role in local Galois module theory Included in this work are expositions of short exact sequences of Hopf algebras Hopf Galois structures on separable field extensions a generalization of Noether's theorem on the Galois module structure of tamely ramified extensions of local fields to wild extensions acted on by Hopf algebras connections between tameness and being Galois for algebras acted on by a Hopf algebra constructions by Larson and Greither of Hopf orders over valuation rings ramification criteria of Byott and Greither for the associated order of the valuation ring of an extension of local fields to be Hopf order the Galois module structure of wildly ramified cyclic extensions of local fields of degree p and p^2 and Kummer theory of formal groups Beyond a general background in graduate level algebra some chapters assume an acquaintance with some algebraic number theory From there this exposition serves as an excellent resource and motivation for further work in the field Chinese Journal of Mathematics, 1996
