Katherine Hayles, 2010-03-15 We live in a world according to N Katherine Hayles where new languages are constantly emerging proliferating and fading into obsolescence These are languages of our own making the programming languages written in code for the intelligent machines we call computers Hayles's latest exploration provides an exciting new way of understanding the relations between code and language and considers how their interactions have affected creative technological and artistic practices My Mother Was a Computer explores how the impact of code on everyday life has become comparable to that of speech and writing language and code have grown more entangled the lines that once separated humans from machines analog from digital and old technologies from new ones have become blurred My Mother Was a Computer gives us the tools necessary to make sense of these complex relationships Hayles argues that we live in an age of intermediation that challenges our ideas about language subjectivity literary objects and textuality This process of intermediation takes place where digital media interact with cultural practices associated with older media and here Hayles sharply portrays such interactions how code differs from speech how electronic text differs from print the effects of digital

media on the idea of the self the effects of digitality on printed books our conceptions of computers as living beings the possibility that human consciousness itself might be computational and the subjective cosmology wherein humans see the universe through the lens of their own digital age We are the children of computers in more than one sense and no critic has done more than N Katherine Hayles to explain how these technologies define us and our culture Heady and provocative *My Mother Was a Computer* will be judged as her best work yet *System in Child Language* Bobi Jones,1970 The Scientific Imagination Arnon Levy,Peter Godfrey-Smith,2019-11-01 This book looks at the role of the imagination in science from both philosophical and psychological perspectives These contributions combine to provide a comprehensive and exciting picture of this under explored subject *Making Sense of Discourse Analysis* Brian Paltridge,2000 Making sense of discourse analysis brings together the key systems of discourse analysis The book overviews and explains communicative language theory speech act theory conversational analysis genre analysis and critical discourse analysis Each chapter provides a historical context definitions for key components of each system or theory being described textual examples with explanation and structured activities for readers to try out the systems and theories for themselves p v Caspar's Directory of the American Book, News and Stationery Trade, Wholesale and Retail, ... in the United States and Canada Carl Nicolaus Caspar,1889 *A System of Rhetoric* Charles William Bardeen,1884 Discourses on human nature, human life, and the nature of religion Orville Dewey,1872 Reference Grammar of the Karo/Rawa Language Norma R.
