## **The Past:**

Engineering the Future, Understanding the Past Ruth Oldenziel, Erik van der Vleuten, Mila Davids, 2017-04-20 Technology today is often presented as our best hope of solving the world's social and sustainability problems. And that's nothing new: engineers have always sought to meet the big challenges of their times, even as those challenges have shaped their technology. This book offers a historical look at those interactions between engineering and social challenges, showing how engineers developed solutions to past problems and looking at the ways that those solutions often bring with them unintended consequences that themselves require solving.

The Voice of the Past Paul Thompson, 2017-02-24 Oral history gives history back to the people in their own words. And in giving a past, it also helps them towards a future of their own making. Oral history and life stories help to create a truer picture of the past and the changing present, documenting the lives and feelings of all kinds of people, many otherwise hidden from history. It explores personal and family relationships and uncovers the secret cultures of work. It connects public and private experience and it highlights the experiences of migrating between cultures. At the same time, it can bring courage to the old, meaning to communities and contact between generations. Sometimes it can offer a path for healing divided communities and those with traumatic memories. Without it, the history and sociology of our time would be poor and narrow. In this fourth edition of his pioneering work, fully revised with Joanna Bornat, Paul Thompson challenges the accepted myths of historical scholarship. He discusses the reliability of oral evidence in comparison with other sources and considers the social context of its development. He looks at the relationship between memory, the self, and identity. He traces oral history through its own past and weighs up the recent achievements of a movement which has become international, with notably strong developments in North America, Europe, Australia, Latin America, South Africa, and the Far East, despite resistance from more conservative academics. This new edition combines the classic text of *The Voice of the Past* with many new sections, including especially the worldwide development of different forms of oral history and the parallel memory boom, as well as discussions of theory in oral history and of memory, trauma, and reconciliation. It offers a deep social and historical interpretation along with succinct practical advice on designing and carrying out a project. *The Voice of the Past* remains an invaluable tool for anyone setting out to use oral history and life stories to construct a more authentic and balanced record of the past and the present.

Doing History Mark Donnelly, Dr. Claire Norton, Claire Norton, 2011 History as an academic discipline has dramatically changed over the last few decades and has become much more exciting and varied as a result of ideas from other disciplines, the influence of postmodernism, and historians' incorporation of their own theoretical reflections into their work. The way history is studied at university level can vary greatly from history at school or as represented in the media, and *Doing History* bridges that gap. Aimed at students of history in their final year of secondary education or beginning degrees, this is the ideal introduction to studying history as an academic subject at university. *Doing History* presents the ideas and debates that shape how we do history today, covering

arguments about nature of historical knowledge and the function of historical writing whether we can really ever know what happened in the past what sources historians depend on and whether the historians version of history has more value than popular histories This practical and accessible introduction to the discipline introduces students to these key discussions familiarises them with the important terms and issues equips them with the necessary vocabulary and encourages them to think about and engage with these questions Clearly structured and accessibly written it is an essential volume for all students embarking on the study of history

**The Past is a Foreign Country** David Lowenthal,1985-11-14 Lowentahal looks at the benefits and burdens of the past how we study the past and how we change it The Academic French Course Antoine Jules César Vencealas Ermanigilde Muzzarelli,1895
