Others Joseph Hillis Miller, 2001-10-21 This volume fulfills the author's career long reflections on radical otherness in literature J Hillis Miller investigates otherness through ten nineteenth and twentieth century authors Friedrich Schlegel Charles Dickens George Eliot Anthony Trollope Joseph Conrad W B Yeats E M Forster Marcel Proust Paul de Man and Jacques Derrida From the exquisite close readings for which he is celebrated Miller reaps a capacious understanding of otherness one reachable not through theory but through literature itself Otherness has wide valence in contemporary literary and cultural studies and is often understood as a misconception by hegemonic groups of subaltern ones In a pleasing counter to this Others conceives of otherness as something that inhabits sameness Instances of the wholly other within the familiar include your sense of self or your beloved your sense of your culture as such or your experience of literary theoretical and philosophical works that belong to your own culture works that are themselves haunted by otherness Though Others begins and ends with chapters on theorists the testimony they offer about otherness is not taken as more compelling than that of such literary works as Dicken's *Our Mutual Friend* Conrad's *The Secret Sharer* Yeats's *Cold Heaven* or Proust's *Remembrance of Things Past* Otherness as this book finds it in the writers read is not an abstract concept It is an elusive feature of specific verbal constructs different in each case It can be glimpsed only through close readings that respect this diversity as the plural in the title Others indicates We perceive otherness in the way that the unseen and the characters emotional responses to it ripples the conservative ideological surface of Howard's *End We* sense it as chaos in Schlegel's radical concept of irony And we gaze at it in the multiple personifications of Heart of Darkness Each testifies in its own way to the richness and tangible weight of an otherness close at hand

Managing Organizational Complexity Kurt A. Richardson, 2005-03-01 In introducing this first volume of a series exploring issues in managing complexity Richardson Institute for the Study of Coherence and Emergence contends that no one has yet developed a reliable skill set for learning from the noise of complex systems

Narrativity, Coherence and Literariness Eva Sabine Wagner, 2020-06-08 The search for the defining qualities of narrative has produced an expansive range of definitions which largely unconnected with each other obscure the notion of narrativity rather than clarifying it The first part of this study remedies this shortcoming by developing a graded macro model of narrativity which

serves three aims Firstly it provides a structured overview of the field of narrative elements and processes Secondly it facilitates the classification of narratological approaches by locating them on different stages of narrativity Finally it focuses attention on narrative dynamics as interpretative processes by which readers seek to produce narrative coherence The second part of this study identifies three different narrative dynamics which characterise Laclos's *Dangerous Connections* Kafka's *Castle* and Toussaint's novels Wagner bases her analyses of these dynamics not only on the texts themselves but also on the ways in which literary scholars imbue the texts with narrative coherence This book provides a long overdue systematisation of the jumbled field of theories of narrativity and opens new perspectives on the difficult relationship between narrative theory and interpretation

Complexity and Entrepreneurship Andreas Liening, 2024-07-03 Starting from the question of what systematic peculiarities in the behavior of leaders and entrepreneurs need to be considered this book provides a new theoretical perspective for entrepreneurial analysis evaluation decision making and action Various theories of complex systems such as the theory of self organization synergetics are presented Additionally methodological approaches for the empirical examination of complexity and the resulting consequences in the field of entrepreneurship are discussed Overall it suggests that old models like the Laplacean worldview or Kant's question of what we can know need to be reconsidered This book offers surprising answers particularly revealing new opportunities and possibilities in complex processes like starting a business The second expanded and updated edition strengthens the focus on entrepreneurship as the book's main theme It includes new and current examples from the real economy as well as additional empirical data supporting the model analysis

Van Nostrand's Scientific Encyclopedia Douglas M. Considine, Glenn D. Considine, 2013-12-11 Advancements in science and engineering have occurred at a surprisingly rapid pace since the release of the seventh edition of this encyclopedia Large portions of the reference have required comprehensive rewriting and new illustrations Scores of new topics have been included to create this thoroughly updated eighth edition The appearance of this new edition in 1994 marks the continuation of a tradition commenced well over a half century ago in 1938 Van Nostrand's Scientific Encyclopedia First Edition was published and welcomed by educators worldwide at a time when what we know today as modern science was just getting underway The early encyclopedia was well received by students and educators alike during a critical time span when science became established as a major factor in shaping the progress and economy of individual nations and at the global level A vital need existed for a permanent science reference that could be updated periodically and made conveniently available to audiences that numbered in the millions The pioneering VNSE met these criteria and continues today as a reliable technical information source for making private and public decisions that present a backdrop of technical alternatives

Religious Individualisation Martin Fuchs, Antje Linkenbach, Martin Mulsow, Bernd-Christian Otto, Rahul Bjørn Parson, Jörg Rüpke, 2019-12-16 This volume brings together key findings of the long term research project Religious Individualisation in Historical Perspective Max Weber Centre for Advanced Cultural and

Social Studies Erfurt University Combining a wide range of disciplinary approaches methods and theories the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods in particular in Asia the Mediterranean and Europe from antiquity to the recent past Contrary to standard theories of modernisation which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon the chapters reveal processes of religious individualisation in a large variety of non Western and pre modern scenarios Furthermore the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency the pluralisation of religious options dynamics of de traditionalisation and privatisation the development of elaborated notions of the self the facilitation of religious deviance and on the notion of dividuality

A New Commentary on Genesis Franz Delitzsch,1899 Dialogues of Love León (Hebreo),2009 Leone s Dialogues consists of three conversations On Love and Desire On the Universality of Love and On the Origin of Love that take place over a period of three subsequent days They are organized in a dialogic format much like a theatrical representation of a conversation between a man Philo who plays the role of the lover and teacher and a woman Sophia the beloved and pupil The discussion covers a wide range of topics that have as their common denominator the idea of Love Through the dialogue the author explores many different points of view and complex philosophical ideas Grounded in a distinctly Jewish tradition and drawing on Neoplatonic philosophical structures and Arabic sources the work offers a useful compendium of classical and contemporary thought yet was not incompatible with Christian doctrine
