Warming,2015-06-02 Excerpt from A Handbook of Systematic Botany The present translation of Dr E Warming s Haandbog i den Systematiske Botanik is taken from the text of the 3rd Danish Edition 1892 and from Dr Knoblauch s German Edition

1890 and the book has been further enriched by numerous additional notes which have been kindly sent to me by the author Dr Warming s work has long been recognised as an original and important contribution to Systematic Botanical Literature and I have only to regret that the pressure of other scientific duties has delayed its presentation to English readers Dr

Warming desires me to record his high appreciation of the careful translation of Dr Knoblauch and his obligation to him for a number of corrections and improvements of which he has made use in the 3rd Danish Edition In a few instances I have made slight additions to the text these however appear as footnotes or are enclosed in square brackets In the present Edition the Thallophytes have been revised and rearranged from notes supplied to me by Dr Knoblauch to whom I am indebted for the Classification of the Fungi according to the more recent investigations of Brefeld The Bacteria have been revised by Dr

Migula the Floride rearranged after Schmitz and the Taphrinace after Sadebeck The main body of the text of the Alg and Fungi remains as it was originally written by Dr Wille and Dr Rostrup in the Danish Edition though in many places

considerable alterations and additions have been made For the sake of comparison a tabular key to the Classification adopted in the Danish Edition is given in the Appendix About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work
