Systematic Analysis Of Gear Failures:

Systematic Analysis of Gear Failures Lester E. Alban,1985 Explores the detailed steps necessary to determine the causes of failure First the physical characteristics of a gear are studied where the stress points are from what directions the forces are applied where the movement of material progresses and where strain patterns exist Second all external conditions and forces are considered With this background information a systematic examination is described from beginning to end the end being a conclusion about the mode and cause of failure

Boolean Algebraic Methods for Phased-mission System Analysis Arun K. Somani, Institute for Computer Applications in Science and Engineering, 1997 Simulating Fatigue Crack Growth in Spiral Bevel Gears ,2000 The majority of helicopter transmission systems utilize spiral bevel gears to convert the horizontal power from the engine into vertical power for the rotor Due to the cyclical loading on a gear s tooth fatigue crack propagation can occur In rotor craft applications a crack s trajectory determines whether the gear failure will be benign or catastrophic for the aircraft As a result the capability to predict crack growth in gears is significant A spiral bevel gear s complex shape requires a three

dimensional model of the geometry and cracks The boundary element method in conjunction with linear elastic fracture mechanics theories is used to predict arbitrarily shaped three dimensional fatigue crack trajectories in a spiral bevel pinion under moving load conditions The predictions are validated by comparison to experimental results The sensitivity of the predictions to variations in loading conditions and crack growth rate model parameters is explored Critical areas that must be understood in greater detail prior to predicting more accurate crack trajectories and crack growth rates in three dimensions are identified Key Engineering Materials ,1986 Ion Implantation and Plasma Assisted Processes Robert Francis Hochman,Hillary Solnick-Legg,Keith O.
