State Trials Committee,1888 **Where the Hell are the Guns?** George G. Blackburn,1997 InWhere the Hell Are the Guns author George Blackburn returns to the early years of the Second World War This volume which completes Blackburn s award winning trilogy extending its coverage to the entire war brings wartime Canada and England to life in captivating often comic detail With the skill of a novelist and the instincts of a seasoned reporter this gifted storyteller traces the evolution of Canada s 4th Field Regiment from a motley assortment of ill equipped recruits to the cream of the Allied artillery more than ready to distinguish itself in the maelstrom of the battle for Normandy The Second World War comes to a generation of Canadians one sunny September weekend in 1939 It is a Canada woefully unprepared for conflict and 4th Field Regiment is rapidly assembled from a grab bag of volunteers from all walks of life many of them mavericks and misfits from a depression ravaged land The regiment passes its first year in Canada in makeshift accommodation including hastily converted stables and pigsties in the exhibition grounds of Ottawa and Toronto For the first few months the soldiers must wear incomplete and moth eaten uniforms from the Great War and their early training is conducted using obsolete equipment or no equipment at all One year into the war the regiment

arrives in England without weapons or vehicles and a month later with Britain moving toward the greatest crisis in her history the regiment is finally equipped with guns French ones with wooden wheels dating from 1898 From these inauspicious beginnings the regiment slowly evolves with mishap and occasionally mayhem along the way into a proud and polished regiment which in 1942 is declared the best field regiment in Britain By the time the Allied troops land on the beaches in Normandy the boys of 4th Field are more than ready to go to war

*British Naval Gun Mountings* Ian Buxton, 2025-01-16 Heavy gun mountings dominated the design of larger warships on account of their size weight protection and cost In the 1890s British gun mountings developed rapidly with new gun technologies wire winding cordite and the rise of the two major ordnance companies Armstrongs and Vickers producing large numbers of weapons for the Royal Navy and for worldwide export But by 1960 aircraft and guided missiles had made the big gun redundant so the period from 1890s to 1950s covering the two world wars is the most historically significant The focus of this book is on the larger mountings and those fitted in the larger ships the massively engineered non transferable mountings whose complexities and associated magazines took up a huge volume of the ship unlike the smaller calibre transferable mountings mostly bolted to the deck Such mountings could weigh over 1000 tons take two years to build and make up a quarter of the cost of a battleship Although they existed in many variants there were only about forty basic mountings from 4 5in to 18in calibre fitted to the majority of the RN's larger ships so these take up the bulk of the book For each well illustrated handbook with colored plates were produced but are largely inaccessible to the public so about 50 of these highly detailed drawings are reproduced at large scale The smaller mountings and the guns themselves each have a separate chapter Although the impact of the book is largely visual there is an expert account of the design construction and installation of such mountings and their manufacturers supported by a range of internal and close up photographs The reference value of the work is enhanced by a comprehensive table of mountings and their characteristics plus a list of all the mountings made by Vickers of Barrow between 1900 and 1950 Providing easy access to so much rarely seen material this handsome volume will appeal to modelmakers ship enthusiasts and technical historians
