McCullough, 2025-05-29 A supplement for Stargrave that explores an artificial intelligence run amok soulless cyborg killers and cyberpunk hacking **Transnational German Cinema** Irina Herrschner, Kirsten Stevens, Benjamin Nickl, 2021-08-31

This volume explores the notion of German cinema as both a national and increasingly transnational entity It brings together chapters that analyse the international circuits of development and distribution that shape the emerging films as part of a contemporary German cinema the events and spectacles that help frame and re frame national cinemas and their discoverability and the well known filmmakers who sit at the vanguard of the contemporary canon Thereby it explores what we understand as German cinema today and the many points where this idea of national cinema can be interrogated expanded and opened up to new readings At the heart of this interrogation is a keen awareness of the technological social economic and cultural changes that have an impact on global cinemas more broadly new distribution channels such as streaming platforms and online film festivals and audience engagement that transcends national borders as well as the cinema space International film production and financing further heightens the transnational aspects of cinema a quality that is often neglected in marketing and branding of the filmic product With particular focus on film festivals this volume explores the tensions between the national and transnational in film but also in the events that sit at the heart of global cinema culture It includes contributions from filmmakers cultural managers and other professionals in the field of film and cinema as well as scholarly contributions from academics researching popular culture film and events in relation to Germany *Universal*

Participating in God Samuel M. Powell,2003 In this exciting work Samuel Powell offers a new constructive and systematic vision of creation by interpreting it in terms of contemporary science and trinitarian theology Powell s work unfolds in three stages building on the multiple ways the doctrine of creation actually functions for Christians He first analyzes its regulative dimension Even in all the multiplicity of historical Christianity he shows the doctrine commits Christians to a particular set of normative beliefs about the world and God s relation to it Second Powell builds on the doctrine s hermeneutical potential It allows Christians both to interpret the meaning of creation in terms of other prevalent philosophical religious or scientific ideas and also to interpret the world as disclosed by scientific theory in theological terms In the heart of his book Powell correlates creaturely characteristics with their participation in God through the trinitarian persons Finally in light of his findings Powell drives home the often ignored ethical dimension of the doctrine especially in relation to the environment our consumerist lifestyle and eschatology Powell s bold proposal harvests from two of the most fruitful fields of recent theology trinitarian theory and religion and science and crafts a creative new vision of how we and all creation participate in the life and work of the triune God
