## Sports Star:

**Power Games** John Peter Sugden, Alan Tomlinson, 2002 Critical and radical perspectives have been central to the emergence of the sociology of sport as a discipline in its own right. This groundbreaking new book is the first to offer a comprehensive theory and method for a critical sociology of sport. It argues that class, political economy, hegemony and other concepts central to the radical tradition are essential for framing understanding and changing social and political relations within sport and between sport and society. The book draws upon the disciplines of politics, sociology, history and philosophy to provide a critical analysis of power relations throughout the world of sport while offering important new case studies from such diverse sporting contexts as the Olympics, world football, boxing, cricket, tennis and windsurfing. In the process it addresses key topics such as nations and nationalism, globalisation, race, gender, political economy. Power Games can be used as a complete introduction to the study of sport and society. And will be essential reading for any serious student of sport. At the same time it is a provocative book that by argument and example challenges those who research and write about sport to make their work relevant to social and political reform.

**Teen World** Joanna Budden, 2009-03-23 Specifically designed for teenagers this photocopyable resource contains 17 teen focussed topics divided into three levels: elementary, intermediate and upper intermediate with step by step teacher's notes.

*The US Sports Film: A Genre of American Dream Time* Danny Gronmaier, 2022-12-05 Sports and film are media that create time. They are temporal not only in the sense that they are defined and regulated by certain temporalities as a result of processes of social negotiation but also in the sense of modulating and intervening in these processes in the first place. They are determined by multiple temporalities referring to and aligning along perceptual corporeality but at the same time they also produce time through and along temporalities of bodily expression and perception. Thus as much as we perceive and understand sports and film by means of our culturally coded conceptions of time this comprehension is itself already the product of these media's fabrication and modulation of certain audiovisual imaginations of time. This book examines these imaginations with regard to US team sports feature films understanding the former as the latter's constitutive conflict which makes these films graspable as a genre in the first place. By addressing temporality as an ever new crystallization of a heroic past and an unattainable future in a saturated yet volatile present this conflict connects substantially to the American Dream as an idea of community building historicity. Departing from a non taxonomic approach in genre theory and such philosophical recognition of the American Dream as less an ideological narrative but more a social and socially effective imaginary embedded in an audiovisual discourse of time this book demonstrates the interrelation of sports cinema and American subjectivization along close readings of the poetics of affect of five exemplary sports films: *FIELD OF DREAMS*, *WE ARE MARSHALL*, *KNUTE ROCKNE ALL AMERICAN*, *JIM THORPE ALL AMERICAN*, *MIRACLE*.

**Power Play** Raymond Boyle, 2009-05-21 The fully revised and updated version of this classic text examines the link between three key obsessions of the 21st century: the media, sport and popular culture.

Gathering new material from around the 2007 Rugby World Cup the Beijing Olympics and the rise of new sports stars such as boxing s Amir Khan and cycling s Victoria Pendleton the authors explore a wide range of sports as well as issues including nationalism gender race political economy and the changing patterns of media sport consumption For those interested in media and sport the second edition combines new and original material with an overview of the developing field of media sport and examines the way in which the media has increasingly come to dominate how sport is played organized and thought about in society It traces the historical evolution of the relationship between sport and the media and examines the complex business relationships that have grown up around television sponsors and sport Covers the following topics the history of media in sport television sport and sponsorship why sport matters to television sports stars sports journalism fans and the audience sport in the digital media economy

**Celebrity Capital** Barrie Gunter,2014-09-25

Celebrities attract the attention of commercial interests and other public figures They receive payments from sponsors to endorse brands They are sought out to appear with politicians during election campaigns They are used to promote health messages In other words celebrities are often perceived to possess qualities that give them special value or what we will refer to here as celebrity capital This means that celebrities are regarded as being able to add premium value to specific objects events and issues and hence render these items more valuable or effective Employing an interesting and new approach to the growing scholarly interest in celebrity culture Barrie Gunter uses the idea of value as expressed through the term capital Capital usually refers to the monetary worth of something Celebrity capital however can be measured in economic terms but also in social political and psychological terms Research from around the world has been collated to provide an evidence based analysis of the value of celebrity in the 21st century and how it can be systematically assessed Including further reading for students key points and end of chapter discussion questions Gunter creates the first methodology to assess the value of fame
