Value Beyond Cost Savings Scott R. Muldavin, 2010 *Constructing Professional Discourse* Concepción Orna-Montesinos, 2012 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discoursal and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and

ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced Greening Affordable Housing Abdullateef Olanrewaju,Zalina Shari,Zhonghua Gou,2019-02-05 Books on green building theories principles and strategies applicable to life cycles of all kinds of buildings and building types are already widely available However those specifically on greening affordable housing that guide various housing stakeholders at different life cycles are still very limited This book intends to fill this gap Integrating green building enables stakeholders to address the environmental component that has not traditionally been seen as an integral part of affordable housing development The book presents theories and principles with practical methods strategies and processes not only to make affordable housing green but also to support economic stability and social equity American Book Publishing Record ,2007 **Environmental Assessment Reference Book** ,1975 *Real Estate* Peter Dent,Michael Patrick,Xu Ye,2012-10-02 Traditional studies of the property market have tended to focus solely on commercial and legal issues but the growing importance of the issue of sustainability means that a different approach is needed This new textbook provides an overview of property within a market context examining the complex nature of property rights and issues related to both investors and occupiers At the same time it assesses property from the perspective of financial social and environment sustainability Topics covered range from the characteristics of property and depreciation to ownership and development through to investments and sustainability reporting The book concludes with key skills in sustainable knowledge needed by those working in the real estate industry Written by an author team of experienced property professionals this essential introductory textbook is well suited for property planning and architecture students on undergraduate graduate and conversion courses as well as those on CPD and training programmes in related areas
