*Sweatshops on Wheels* Michael H. Belzer, 2000 Long hours low wages and unsafe workplaces characterized sweatshops a hundred years ago These same conditions plague American trucking today *Sweatshops on Wheels* Winners and Losers in Trucking Deregulation exposes the dark side of government deregulation in America s interstate trucking industry In the years since deregulation in 1980 median earnings have dropped 30% and most long haul truckers earn less than half of pre regulation wages Work weeks average more than sixty hours Today America s long haul truckers are working harder and earning less than at any time during the last four decades Written by a former long haul trucker who now teaches industrial relations at Wayne State University *Sweatshops on Wheels* raises crucial questions about the legacy of trucking deregulation in America and casts provocative new light on the issue of government deregulation in general *Trucking in the Age of Information* Dale Belman, Chelsea White, 2018-01-18 *Trucking in the Age of Information* provides a comprehensive overview of the contemporary trucking industry Prior research on trucking has focused on the effects of deregulation on the industry but the industry s current transformation is driven by information technology emerging business strategies globalization of commodity production and the rise of package express and logistics The volume brings together acknowledged and emerging scholars of the industry including Thomas Corsi University of Maryland Chelsea White III Georgia Tech Starr McMullen Oregon State University Will Mitchell Duke University Jeff Liker University of Michigan Francine LaFontaine University of Michigan Kristen Monaco California State University at Long Beach and Michael Conyngham International Brotherhood of Teamsters to address issues including technological change third party logistics lean trucking driver safety and health homeland security and the consolidation of trucking services Each chapter provides an overview of industry issues and a discussion of current research *Data Driven* Karen Levy, 2024-06-18 A behind the scenes look at how digital surveillance is affecting the trucking way of life Long haul truckers are the backbone of the American economy transporting goods under grueling conditions and immense economic pressure Truckers have long valued the day to day independence of their work sharing a strong occupational identity rooted in a tradition of autonomy Yet these workers increasingly find themselves under many watchful eyes *Data Driven* examines how digital surveillance is upending life and work on the open road and raises crucial questions about the role of data collection in broader systems of social control Karen Levy takes readers inside a world few ever see painting a bracing portrait of one of the last great American frontiers Federal regulations now require truckers to buy and install digital monitors that capture data about their locations and behaviors Intended to address the pervasive problem of trucker fatigue by regulating the number of hours driven each day these devices support additional surveillance by trucking firms and other companies Traveling from industry trade shows to law offices and truck stop bars Levy reveals how these invasive technologies are reconfiguring industry relationships and providing new tools for managerial and legal control and how truckers are challenging and resisting them *Data Driven* contributes to an emerging conversation

about how technology affects our work institutions and personal lives and helps to guide our thinking about how to protect public interests and safeguard human dignity in the digital age

Mares, Laura-Anne Minkoff-Zern, 2025 Examining the essential role and exploitation of frontline workers across the food chain Food consumers are demanding a healthier and more sustainable food system Yet labor is rarely part of the discussion In *Will Work for Food* Laura Anne Minkoff Zern and Teresa Mares chronicle labor across the food chain connecting the entire food system from fields to stores restaurants home kitchens and even garbage dumps Using a political economy framework the authors argue that improving labor standards and building solidarity among frontline workers across sectors is necessary for creating a more just food system What would it take they ask to move toward a food system that is devoid of human exploitation Combining insights from food systems and labor justice scholarship with actionable recommendations for policy makers the book is a call to action for labor activists food studies students and scholars and anyone interested in food justice

*Women's Work* Michelle Haberland, 2001 This dissertation explores the development of the apparel industry in the southern United States from 1937 to 1980 The apparel industry has received scant attention from historians especially when compared to the numerous influential works examining the southern textile industry The history of the southern clothing industry and its workers merits individual attention for it yields its own distinctive story By virtue of its size its reliance upon female labor and its broad geographic scope the southern apparel industry provides an opportunity to connect the often disparate concerns of southern cultural history labor history and women s history This study examines the essential features of the apparel industry in the South and the varied experiences of clothing workers during the industry s great expansion from the late 1930s until the demise of the southern branch of the industry in the 1980s The scope of the inquiry is broad encompassing the role of organized labor the changing racial composition of the industry s work force the creation of a feminine work culture and its As companies relocated their manufacturing facilities in the South they capitulated to the system of racial segregation After the passage of the Civil Rights Act of 1964 the whiteness of occupations within the apparel industry declined and the racial and ethnic diversity of the industry increased African American and Latina women workers accounted for a large percentage of what was once a predominantly white industry And as the ethnic and racial diversity of the southern clothing industry increased organizing efforts were more successful The influential union label and boycott

strategies of the clothing industry provide an important perspective on the place of women workers in southern culture and the labor movement The role of women as the primary consumers of the family placed them in a critical position to influence the success or failure of boycotts union label programs and ultimately solidarity But as the United States apparel industry collapse began in the 1960s apparel unions chose to rely on Buy American boycott campaigns that pitted them against the very workers they had hoped to organize      *UAW Washington Office Reports* ,1994      **Death of the Black-Haired Girl**
