Cosmology Calendars and Horizon Based Astronomy in Ancient Mesoamerica is an interdisciplinary tour de force that establishes the critical role astronomy played in the religious and civic lives of the ancient peoples of Mesoamerica. Providing extraordinary examples of how Precolumbian peoples merged ideas about the cosmos with those concerning calendar and astronomy the volume showcases the value of detailed examinations of astronomical data for understanding ancient cultures. The volume is divided into three sections investigations into Mesoamerican horizon based astronomy the cosmological principles expressed in Mesoamerican religious imagery and rituals related to astronomy and the aspects of Mesoamerican calendars related to archaeoastronomy. It also provides cutting edge research on diverse topics such as records of calendar and horizon based astronomical observation like the Dresden and Borgia codices iconography of burial assemblages architectural alignment studies urban planning and counting or measuring devices. Contributors who are among the most respected in their fields explore new dimensions in Mesoamerican timekeeping and skywatching in the Olmec Maya Teotihuacano Zapotec and Aztec cultures.
