Bodies of War Lisa M. Budreau, 2010 World War I marked the first war in which the United States government and military took full responsibility for the identification, burial and memorialization of those killed in battle and as a result the process of burying and remembering the dead became intensely political. The government and military attempted to create a patriotic consensus on the historical memory of World War I in which war dead were not only honored but used as a symbol to legitimize America's participation in a war not fully supported by all citizens. In this book the author unpacks the politics and processes of the competing interest groups involved in the three core components of commemoration: repatriation, remembrance and return. This book emphasizes the inherent tensions in the politics of memorialization and explores how those interests often conflicted with the needs of veterans and relatives.
