## **Starburst-AGN Connection:**

**Advanced Lectures on the Starburst-AGN Connection** D. Kunth, 2001 A group of leading experts in the field of starbursts and active galactic nuclei have joined hands to produce this review volume which covers the starburst AGN connection and the tests to be carried out with the upcoming new astronomical facilities to ascertain the relevance of both components to the formation and evolution of galaxies The book is addressed to advanced graduate students and researchers in the fields of active galactic nuclei and young galaxies [The Starburst-AGN Connection](#) Weimin Wang, 2009 Starburst and AGN which are among the most active extragalactic phenomena have been studied independently for many years Recent observations reveal that many galaxies exhibit both AGN and starburst features which naturally invites an investigation of their physical connection Considerable new multi wavelength observations during the last decade together with the results of many theoretical studies are enabling the physics and connectedness of these two phenomena to be understood more deeply These proceedings are of a conference held at Shanghai Normal University on a very pleasant campus southwest of the city More than 120 participants from over 20 different countries were in attendance The goals of the conference were to review past progress present new results plan future work and establish observational and theoretical collaborations We were treated to the first in depth presentation of Spitzer Space Telescope mid IR spectroscopy and imaging photometry as well as new detailed theoretical modeling of the relationship and interaction between starbursts and AGN Also presented were major new studies of the local universe from SDSS and other ground based radio IR optical and space based x ray observatories The importance of the intense starburst and AGN activity in the early universe only 1 billion years after the Big Bang is becoming evident from the very early formation of extremely massive galaxies and black holes The coming together and cross fertilization of these studies at the conference was most productive
