Standing Room Only Our Overcrowded Planet:

Spaceship Earth in the Environmental Age, 1960-1990 Sabine Höhler, 2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War Höhler's study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades

Beyond the Cold War Francis J. Gavin, Mark Atwood Lawrence, 2014-03 As globalization has deepened in recent years historians have begun to see that many of the global challenges we face today first drew serious attention in the 1960s This book examines how the Johnson presidency responded to these problems and draws out the lessons for today

Family Planning and Population Research, 1970, Hearings Before the Subcommittee on Health...91-1 and 2, on S. 2108 and 3219, Dec. 8, 9, 1969; and Feb. 19, 1970 United States. Congress. Senate. Committee on Labor and Public Welfare, 1970

The Green Crusade Charles T. Rubin, 1994 As recently as fifty years ago the billowing industrial smokestack was a proud symbol of progress and power today it is an image of unbridled corporate irresponsibility This change in public attitudes reflects a shift in social values as rapid and profound as any in American history Its effects are so far reaching that scarcely anyone imagines there was ever an alternative view of the relationship between human beings and nature Yet for all the time and energy devoted to discussion of environmentalism as a social and political movement no one has questioned its existence as a coherent philosophy or given an account of how it first emerged in public consciousness Most people would assume that the environmental idea and the powerful political movement it inspired must have emerged in response to self evident environmental problems such as air and water pollution acid rain the human destruction of natural habitats and the resulting extinction of endangered species But as Charles T Rubin shows in *The Green Crusade* environmental problems are far from being a matter of common sense He points out that while such situations almost certainly existed in the past they were defined in different terms implying different kinds of social and political solutions Rubin tells the story of this massive yet strangely unnoticed transformation of public perception and social morality by focusing on the small group of influential writers and thinkers Rachel Carson Barry Commoner Paul Ehrlich E E Schumacher and others whose enormously popular writings gave birth to the environmental movement as we know it Cutting through their pretense of presenting common sense ideas based on sound scientific conclusions Rubin's thoughtful discussion of these writers political ideas refutes their pretensions to scientific accuracy and reveals the radical foundations of their project These environmental popularizers Rubin argues have spent the last thirty years playing on the hopes and fears of the public in order to advance a political agenda that goes well beyond the protection of nature and envisions a total transformation of human society Nor would this social transformation be benign in Rubin's view For these

utopian reformers if they had their way would willingly adopt totalitarian means to save us as they see it from ourselves and Rubin argues that as red totalitarianism declines the aspirations of our radical reformers may become increasingly green

Essential AS Geography Simon Ross, John Morgan, Richard Heelas, 2000 Essential AS Geography provides comprehensive coverage of the range of subjects and themes for AS Geography The book has been designed to smooth the transition between GCSE and A Level standard and rapidly instil confidence in the first year student providing the means to achieve examination success
