Star-counter Dennis Smith,1970    **The Art of Translation in Seamus Heaney's Poetry** Edward T. Duffy,2024-03-13  
The Art of Translation in Seamus Heaney's Poetry is a critical study of the poet's later work. While exploring his practice as a translator, it also traces his increasing preoccupation with the possibilities and conditions of translation in the theological sense of being lifted up in spirit. To the work of this philosophical poet who would be both earthed and heady, this book brings the insights of ordinary language philosophy as practiced by Stanley Cavell. It devotes separate chapters to Station Island and three later collections Seeing Things, Electric Light, and Human Chain. The first of these addresses the most fundamental change in Heaney's life when he acknowledges the need and chance to re-envision his Irish Catholic upbringing; it is also replete with both the activity and the trope of translation. Published seven years later, Seeing Things begins with a translation of Virgil's golden bough episode and ends with a similar crossing over into the underworld by Dante. Heaney transforms both into poems about poetry. In Electric Light, Heaney returns to Virgil but now he concentrates not on the hero of the Aeneid but on Virgil's earlier efforts in pastoral, a mode of writing that Heaney takes as a model for his own time and place of devastated order. Heaney returns to the Aeneid in Human Chain but this time around he gives all his attention to the scene of the human souls in Elysium seeking rebirth and turns it into an image for the need and chance of pronouncing a final Yes to our world and our place in it.

On what basis can we establish an alternative to the unifying of cultures brought about by economic globalization? When ideas like objects and words can be translated and marketed everywhere, what forms of critique are available? Straddling the fields of political philosophy, comparative literature, animal studies, global studies, and political economy, *Untranslating Machines* proposes to this end a weakened, defective concept of untranslatability. The analytic frame of Jacques Lezra's argument is rooted in Marx, Derrida, and Wittgenstein. He moves historically from the moment when translation becomes firmly wed to mercantilism and to the consolidation of proto-national state forms in European early modernity to the current moment in which the flow of information, commodities, and value creation protocols among international markets produces the regulative fantasy of a global, coherent market of markets. In a world in which translation and translatability have become a means and a model for the consolidation of a global cultural system, this book proposes an understanding of untranslatability that serves to limit the articulation between a globalized capitalist value system and the figure and techniques of translation.
