Starting Advanced Mathematics The Essential Foundation:

Starting Advanced Mathematics Hugh Neill, Sarah Payne, 2002-03-14 Starting Advanced Mathematics is a self study guide for students who will be continuing their study of Mathematics after GCSE either to AS A level or as part of the International Baccalaureate It will enable students to consolidate the basic algebra and trigonometry skills that they will require during their study of advanced Mathematics Other GCSE formulae and results that they may require during their post 16 studies are included for reference The book is also a valuable revision aid for Higher Tier GCSE students who need more practice in Algebra and Trigonometry Foundations of Stable Homotopy Theory David Barnes, Constanze Roitzheim, 2020-03-26 The

beginning graduate student in homotopy theory is confronted with a vast literature on spectra that is scattered across books articles and decades There is much folklore but very few easy entry points This comprehensive introduction to stable homotopy theory changes that It presents the foundations of the subject together in one place for the first time from the motivating phenomena to the modern theory at a level suitable for those with only a first course in algebraic topology Starting from stable homotopy groups and co homology theories the authors study the most important categories of spectra and the stable homotopy category before moving on to computational aspects and more advanced topics such as monoidal structures localisations and chromatic homotopy theory The appendix containing essential facts on model categories the numerous examples and the suggestions for further reading make this a friendly introduction to an often daunting subject
