with Technology Allison W. McCulloch, Jennifer N. Lovett, 2023-08-01 This timely book provides support for secondary mathematics teachers learning how to enact high quality equitable math instruction with dynamic mathematics specific technologies. Using practical advice from their own work as well as from interviews with 23 exceptional technology using math teachers, the authors develop a vision of teaching with technology that positions all students as powerful doers of mathematics using math specific technologies e.g. dynamic graphing and geometry applications, data exploration tools, computer algebra systems, virtual manipulatives. Each chapter includes sample tasks, advice from technology using math teachers, and guiding questions to help teachers with implementation. The book offers a rich space for secondary math teachers to explore important pedagogical practices related to teaching with technology combined with broader discussions of changing the narratives about students emphasizing the mathematics they can do and the mathematics they deserve. Accompanying online support materials include video vignettes of teachers and students interacting around technology enhanced tasks in the classroom as well as examples of more than 30 high quality technology enhanced tasks. Applied Calculus for Business, Economics, and the Social and Life Sciences Laurence D. Hoffmann, Gerald L. Bradley, Kenneth H. Rosen, 2005 The Expanded Eighth Edition of Applied Calculus for Business, Economics and the Social and Life Sciences includes four additional chapters: Chapter 8 Differential Equations, Chapter 9 Infinite Series and Taylor Approximations, Chapter 10 Probability and Calculus, Chapter 11 Trigonometric Functions. The textbook meets the needs of instructors who cover topics in one or more of these four chapters together with material from the initial seven chapters. This is often a two semester course. The word Applied in this title distinguishes this volume from the shorter edition. The book introduces calculus in real world contexts; the primary goal is to provide a sound, intuitive understanding of basic concepts students need as they pursue careers in business, the life sciences and the social sciences. *Exploring Calculus with Analyzer* Richard E.
