Something In Common:

No Other Name? Paul F. Knitter,1985-01-01 *Introduction to Philosophy* Martin Heidegger,2024-04-09 Introduction to Philosophy volume 27 of Heidegger's Complete Works presents Heidegger's lecture course delivered in the winter semester of 1928/1929 at the University of Freiburg translated into English for the first time by William McNeil. In this lecture series Heidegger explores two major themes: the relation between philosophy and science and the relation between philosophy and Weltanschauung worldview. Through extensive analyses of truth, unconcealment, and transcendence, he delves into topics that would expand into his later work. From being with and community to the phenomenon of world and the play of world, Heidegger covers a wide range of philosophical concepts with unprecedented clarity and profound insight. Introduction to Philosophy offers an encounter with a true master at work.

Susan Gay Drummond,1997 Drummond law McGill U focuses on the delivery of justice in Inuit communities in northern Quebec in order to investigate the complexities and contradictions of accommodation between Aboriginal and non-Aboriginal legal systems. She argues that the conflicts project an incommensurability between underlying cultural codes and reflects on intercultural history, concepts of identity and belonging, and communication across cultures and genders.
