

# What Is Social Learning Theory?

## A Behaviorist + Cognitive Hybrid Model

---

### Observation

A stimulus is given attention and/or observed. This can be in real-time, reflection, predictive, or imagined.

### Internalization

Initial meaning is created in the mind of the observer.

**Definition:** Social learning theory is a behavioral theory that posits that new behaviors can be learned by observing and imitating others.

### Imitation

Some form of imitation of that behavior--in part or its entirety--occurs. This reproduction deepens internalization and elicits evaluation by imitator.

### Feedback

Feedback loop: ongoing motivation is decided by reflection and perceived relative 'success' (e.g., the effects) of the behavior.

## **Social Interaction In Learning And Instruction:**

*Social Interaction in Educational Settings* Albert H. Yee, 1971      Classroom Interactions and Social Learning Kristiina Kumpulainen, David Wray, 2001-12-06 Today's classroom presents a wealth of opportunities for social interaction amongst pupils leading to increased interest in teachers and researchers into the social nature of learning While classroom interaction can be a valuable tool for learning it does not necessarily lead to useful learning experiences Through case studies this book highlights the use of new analytical methodologies for studying the content and patterns of children's interactions and how these contribute to their construction of knowledge Classroom Interaction and Social Learning will be of interest to students and in service teachers and researchers concerned with classroom discourse and learning      **Dialogic Learning** Jos van den Linden, Peter Renshaw, 2006-01-12 Contemporary researchers have analysed dialogue primarily in terms of instruction conversation or inquiry There is an irreducible tension when the terms dialogue and instruction are brought together because the former implies an emergent process of give and take whereas the latter implies a sequence of predetermined moves It is argued that effective teachers have learned how to perform in this contradictory space to both follow and lead to be both responsive and directive to require both independence and receptiveness from learners Instructional dialogue therefore is an artful performance rather than a prescribed technique Dialogues also may be structured as conversations which function to build consensus conformity to everyday ritualistic practices and a sense of community The dark side of the dialogic we and the community formed around our and us is the inevitable boundary that excludes them and theirs When dialogues are structured to build consensus and community critical reflection on the bases of that consensus is required and vigilance to ensure that difference and diversity are not being excluded or assimilated see Renshaw 2002 Again it is argued that there is an irreducible tension here because understanding and appreciating diversity can be achieved only through engagement and living together in communities Teachers who work to create such communities in their classrooms need to balance the need for common practices with the space to be different resistant or challenging again an artful performance that is difficult to articulate in terms of specific teaching techniques      Resources in Education , 1995      *Resources in Vocational Education* , 1979      **Conversation Analytic Perspectives on English Language Learning, Teaching and Testing in Global Contexts** Hanh thi Nguyen, Taiane Malabarba, 2019-02-26 This edited volume brings together 10 cutting edge empirical studies on the realities of English language learning teaching and testing in a wide range of global contexts where English is an additional language It covers three themes learners development of interactional competence the organization of teaching and testing practices and sociocultural and ideological forces that may impact classroom interaction With a decided focus on English as a Foreign Language contexts the studies involve varied learner populations from children to young adults to adults in different learning environments around the world The insights gained will be of interest to EFL professionals as well as teacher trainers policymakers and researchers      **Social Interaction and Teacher Cognition** Li

Li,2017-02-06 Investigates language teachers thoughts beliefs and knowledge through the lens of social interaction In the past decade there has been a surge of interest in the study of language teacher cognition what language teachers know think and believe and of its relationship to teachers classroom practices Social Interaction and Teacher Cognition is the first book to use a discursive psychological perspective to examine teacher cognitions Informed by conversation analysis CA the book offers a close examination of cognition in interaction in three distinctive aspects learning to teach novice and expert teachers cognition and interactive decision making The book views cognition as a socially constructed and contextual process and treats interaction as a framework that deals with psychological matters in a public and visible way It will be of particular relevance to those researching teacher cognition in EFL contexts and will appeal to anyone interested in the study of classroom interaction Features a three part structure of survey analysis and application Takes a discursive psychological approach to teacher cognitions Uses conversation analysis to examine cognition in interaction Provides detailed examples of language in interaction in EFL contexts     Content-based Second Language Teaching and Learning Marjorie Hall Haley,Theresa Y. Austin,2004 This text examines second language pedagogy from two critical fields of literature psycholinguistics and socio cultural offering a fresh perspective on interactive content based language teaching and learning Unique in its kind this highly practical text offers more methodological approaches to teaching in ESL settings than any other book on the market making it a perfect match for undergraduate pre service teachers who are learning how to teach ESL students in their classrooms Novice teachers will have the opportunity to interact with the text reflect and consult with colleagues partners and classmates by being able to write in the text revisit those responses and view video clips on the Companion Website     *Education as a Science* Alexander Bain,1879     **Education as a Science** Bain,1879     *Soviet Education* ,1990     Instructor's Manual to Accompany Principles and Methods of Adapted Physical Education and Recreation David Auxter,1989     *Comparative Education: Concept, Research, and Application* Conference on Comparative Education,William W.
