Social Justice and Third World Education Timothy J. Scrase, 2021-12-12 First Published in 1997 In much of the comparative education literature questions of educational inequality and lack of educational opportunity in the developing world stand as perplexing complex and difficult problems Yet while inequality in education remains one of the most researched and written about topics in the discipline the question of social justice and its relationship to education remains implicit This volume aims to reverse this trend to make the issue of social justice both in theory and practice central and explicit

Third World Education Anthony R. Welch, 2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged

International Policies for Third World Education Phillip W. Jones, 2018-05-08 Originally published in 1988 Bringing the world close to universal literacy will be a major legacy of the twentieth century But the rapid and widespread developments in education that have enabled this to happen have not taken place in a social and political vacuum In some instances conditions conducive to mass literacy have only come about through popular revolution or rapid economic development but a less spectacular and frequently less tangible role has been played by a number of international agencies The most prominent of these is Unesco which has had the goal of global literacy at the heart of its endeavours ever since its foundation in 1946 Agreement on the best means of achieving this goal however has been very difficult to come by and Unesco's literacy program has been shaped by internal and external politics as well as by local exigencies This book outlines how Unesco's literacy program has evolved and by discussing how idealistic aims and intentions have been given shape and direction by more immediate political and bureaucratic concerns provides a critique in miniature of the post war history of the United
