### Investigating Social Problems A. Javier

Trevino, 2014-08-08 Each chapter in this innovative social problems text is written by a specialist or pair of specialists from appropriate subfields within sociology. The typical single author approach is limiting given the complexity of the contemporary issues surrounding each social problem discussed. Involving many content experts ensures that the theories, research and examples used in each chapter will be as current and relevant as possible. Chapters open with personal statements from the contributing authors discussing how they got involved with studying the problem they are writing about. Javier Trevino serves as the general editor making sure that each author follows the chapter template and maintains a consistency in level and style.

**The Cambridge Handbook of Social Problems:** A. Javier Treviño, 2018-03-22 The introduction of the Affordable Care Act in the United States, the increasing use of prescription drugs and the alleged abuse of racial profiling by police are just some of the factors contributing to twenty first century social problems. The Cambridge Handbook of Social Problems offers a wide ranging roster of the social problems currently pressing for attention and amelioration. Unlike other works in this area it also gives great consideration to theoretical and methodological discussions. This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems. It is suitable for classes in social problems, current events and social theory. Featuring the most current research the Handbook provides an especially useful resource for sociologists and graduate students conducting research.

**Educational Research: the Educationalization of Social Problems** Paul Smeyers, 2009-04-14 Pushing social responsibilities on schools is a process that has been underway for a long time. This phenomenon has been studied more in Europe than in North America and the U.K. and has been labelled *Pdagogisierung*. The editors have chosen to use *Educationalization* to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems. The term describes these phenomena as a sub process of the modernization of society but it also has negative connotations such as increased dependence, patronization and pampering. In this book distinguished philosophers and historians of education focus on educationalization to expand its meaning through an engagement with educational theory. Topics discussed are the family and the child, the learning society, citizenship education, widening participation in higher education, progressive education and schooling movements such as No Child Left Behind. Smeyers and Depaepe's book offers great insights into one of the most ambivalent phenomena of today's educational world and especially educational policy. The contributions assembled represent perspectives of some of the most respected scholars in the field. Their manifold critiques of the educationalization of social problems are rather convincing. Our time is definitely ripe for such analysis. Roland Reichenbach Center for Educational Studies, University of Basel, Switzerland. This is a challenging critical and analytical treatment of the tendency of contemporary administrations to overburden educational

institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic problems It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers practitioners and researchers alike David Bridges Von H gel Institute St Edmund s College Cambridge England This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research Also realized by the Research Community are Educational Research Why What Works Doesn t Work 2006 and Educational Research Networks and Technologies 2007
