Social Structure And Change Vol 4 Development And Ethnicity:

Exploring Social Movements Biswajit Ghosh, 2024-06-18 This book introduces the readers to the dynamics of various kinds of social movements. It examines how social movements have become an instrument of social change including assertion of identity and protest against marginalisation. This book describes three major domains: conceptual, experiential, and the impact of globalisation on social movements. The volume begins by locating social movements within broad and contemporary social processes and explores the intrinsic and complex patterns of dynamics among state, market, and social movements from a critical sociological perspective. It explains the meaning, basic features, origins, and types, leadership, and ideology and perspectives of social movements and probes into major experiences of eight social movements in India: namely, peasant and farmers, tribal, Naxalite and Maoist, Dalit, working class, women, ethnic, and environmental movements. This book also analyses the role of information technology, media, and civil society in the spread and continuation of such movements. The experiences of queer, new religious, anti-systemic, and anti-displacement movements would also help readers understand how globalisation has offered new avenues of protest to diverse sections of the population. Lessons of anti-globalisation movements across the world provide a futuristic perspective in assessing the strength of social movements in a global society. This book will be useful to the students, researchers, and faculty working in the field of political science, sociology, gender studies, and post-colonial contemporary Indian politics, in particular. It will also be an invaluable and interesting reading for those interested in South Asian studies. **Guru Nanak Journal of Sociology**, 1996

Attacking Poverty, 2000 At the start of each decade the World Development Report focuses on poverty reduction. The World Development Report now in its twenty-third edition proposes an empowerment, security, opportunity framework of action to reduce poverty in the first decades of the twenty-first century. It views poverty as a multidimensional phenomenon arising out of complex interactions between assets, markets, and institutions. This Report shows how the experience of poverty reduction in the last fifteen years has been remarkably diverse and how this experience has provided useful lessons as well as warnings against simplistic universal policies and interventions. It shows how current global trends present extraordinary opportunities for poverty reduction but also cause extraordinary risks including growing inequality.
