Social Scientific Models for Interpreting the Bible John Pilch, 2021-10-01 Fourteen members of The Context Group honor Bruce J Malina and his scholarship in this volume by following his consistent example of developing or using explicit social scientific models to interpret documents from the ancient Mediterranean world Ordinary features of that cultural world such as gossip reciprocity a pervasive military presence the power of women and becoming a follower of Jesus stand out with greater clarity in the Bible when a reader understands the cultural matrix in which such social dynamics function These essays reflect The Context Group s more than twenty years of collaborative experience in researching the cultural context of the Bible New insights are built on the solidly established foundations of their earlier cross cultural studies Readers will find the individual essays enlightening and challenging Taken as a whole they form a valuable resource and a stimulating and helpful aid to further study Making Places in the Prehistoric World Joanna Bruck, Melissa

Goodman, 2012-10-12 This groundbreaking volume addresses issues central to the study of prehistoric settlement including group memory the transmission of ideology and the impact of mobility and seasonality on the construction of social identity Building on these themes the contributors point to new ways of understanding the relationship between settlement and landscape by replacing Capitalist models of spatial relations with more intimate histories of place **Papers of 3d**

Conference on Scientific Manpower , 1953 Invisible Crisis of Contemporary Society Bernard S Phillips, Louis C. Johnston, 2015-12-03 Is there a growing gap in today s world between cultural aspirations and their fulfillment a gap that is increasing social problems of all kinds If so what forces are producing that gap How can these forces be changed To answer these questions Phillips and Johnston employ a very broad approach to the scientific method drawing evidence from a wide variety of data and sources including sociologists psychologists political scientists historians philosophers educators psychiatrists and novelists They find substantial evidence for a widening gap suggesting an invisible crisis throughout contemporary society They also find substantial evidence that a simplistic and static metaphysical stance or worldview is largely responsible for that gap and that an alternative worldview can work to close that gap Something for Everyone?

Simone Boogaarts-de Bruin, 2011 The urban population is becoming increasingly diverse and growing ethnic diversity is having a singular effect on nightlife in Dutch cities By studying the motivation behind and nightlife choices of the young people who participate in ethno party scenes Boogaarts de Bruin investigates how the changing urban population affects the supply side of the nightlife market using an analytical model she has developed and which she calls the model of structured choice This approach is sensitive to the flexible use of the processes of agency and structure due to the systematic distinction that it makes between societal and personal factors Accordingly it is revealed that in order to analyze and adequately explain the nightlife experiences of and choices made by ethnic youngsters an integrated model is required which centralizes the interaction between the structural strategies of the producers on the one hand and the personal preferences and agency of the consumers on the other What is more this book demonstrates that nightlife has changed because of the increasing ethnic diversity of the Dutch population Finally in the epilogue the fieldwork results are discussed in light of the currently heated debate regarding the integration processes of ethnic minority young people in nightlife Language, Sex and Social
