

The background of the book cover is a painting of a city street scene. In the foreground, a large, multi-story building with a dark roof and red-tinted walls is visible. To the left of the building is a circular fountain with water spraying upwards. The street is paved and has a red-tinted curb. In the background, other buildings and trees are visible under a blue sky. The overall style is impressionistic with visible brushstrokes.

DIAGNOSING SOCIAL PATHOLOGY

FREDERICK NEUHOUSER

Social Pathology:

Understanding Problems of Social Pathology Przemysław Piotrowski, 2006 A social reality including social pathology is constantly being constructed anew in the process of confrontation of perspectives and definitions of individuals institutions and social groups Therefore what interests the authors of the book more than the disputes on the right definition is the understanding of social pathology phenomena their causes mechanisms and social costs Complex and multidimensional as it is social reality is best described from various perspectives For that reason a potentially interesting and fruitful interdisciplinary approach characterises the book It contains mainly texts of psychologists who work at the Jagiellonian University in Cracow The articles of sociologists lawyers and one theoretician of education broaden the horizon and thus contribute new insights to the entirety of the book The body of articles predominantly relates to Polish reality as well as stems from the experience of the Polish society in the period of political transformation No less interesting are the articles on the pathology of political discourse community policing problems in France and issues of social concern victims of violence problems of the elderly and collective behaviour The volume is of interest for social scientists and professionals as well as for students

Diagnosing Social Pathology Frederick Neuhouser, 2022-10-27 Can a human society suffer from illness like a living thing And if so how does such a malaise manifest itself In this thought provoking book Fred Neuhouser explains and defends the idea of social pathology demonstrating what it means to describe societies as ill or sick and why we are so often drawn to conceiving of social problems as ailments or maladies He shows how Rousseau Hegel Marx and Durkheim four key philosophers who are seldom taken to constitute a tradition deploy the idea of social pathology in comparable ways and then explores the connections between societal illnesses and the phenomena those thinkers made famous alienation anomie ideology and social dysfunction His book is a rich and compelling illumination of both the idea of social disease and the importance it has had and continues to have for philosophical views of society

Society and Social Pathology R.C. Smith, 2017-02-21 This book offers one of the most comprehensive studies of social pathology to date following a cross disciplinary and methodologically innovative approach It is written for anyone concerned with understanding current social conditions individual health and how we might begin to collectively conceive of a more reconciled postcapitalist world Drawing reference from the most up to date studies Smith crosses disciplinary boundaries from cognitive science and anthropology to critical theory systems theory and psychology Opening with an empirical account of numerous interlinked carises from mental health to the physiological effects of environmental pollution Smith argues that mainstream sociological theories of pathology are deeply inadequate Smith introduces an alternative critical conception of pathology that drills to the core of how and why society is deeply ailing The book concludes with a detailed account of why a progressive and critical vision of social change requires a holistic view of individual and societal transformation Such a view is grounded in the awareness that a sustainable transition to postcapitalism is ultimately a many sided social individual and structural healing
