Body of Knowledge for Modeling and Simulation

Tuncer Ören, Bernard P. Zeigler, Andreas Tolk, 2023-01-27 Commissioned by the Society for Modeling and Simulation International SCS this needed useful new Body of Knowledge BoK collects and organizes the common understanding of a wide collection of professionals and professional associations. Modeling and simulation M S is a ubiquitous discipline that lays the computational foundation for real and virtual experimentation clearly stating boundaries and interactions of systems data and representations. The field is well known too for its training support via simulations and simulators. Indeed with computers increasingly influencing the activities of today's world M S is the third pillar of scientific understanding taking its place along with theory building and empirical observation. This valuable new handbook provides intellectual support for all disciplines in analysis, design and optimization. It contributes increasingly to the growing number of computational disciplines addressing the broad variety of contributing as well as supported disciplines and application domains. Further each of its sections provide numerous references for further information. Highly comprehensive the BoK represents many viewpoints and facets captured under such topics as Mathematical and Systems Theory Foundations, Simulation Formalisms and Paradigms, Synergies with Systems Engineering and Artificial Intelligence, Multidisciplinary Challenges, Ethics and Philosophy, Historical Perspectives. Examining theoretical as well as practical challenges this unique volume addresses the many facets of M S for scholars, students and practitioners. As such it affords readers from all science, engineering and arts disciplines a comprehensive and concise representation of concepts, terms and activities needed to explain the M S discipline. Tuncer Ören is Professor Emeritus at the University of Ottawa. Bernard Zeigler is Professor Emeritus at the University of Arizona. Andreas
