hemorrhage aneurysms and A VMs which were discussed under about 14 headings each But vein of Galen malformations dural A VMs cavernous angiomas and venous angiomas renamed developmental venous anomalies came under scrutiny not always with consensus Trends are perceptible such as fibrinolysis of subarachnoid clot non surgery for Galenic and dural malformations the benignity of venous angioma but there is still much variation in approach pharmacologically technically and with such as the evolving endovascular and radiosurgical stories used alone or in conjunction *Medical Marginality in South Asia* David Hardiman, Projit Mukharji, 2013-05-07 Examining the world of popular healing in South Asia this book looks at the way that it is marginalised by the state and medical establishment while at the same time being very important in the everyday lives of the poor It describes and analyses a world of subaltern therapeutics that both interacts with and resists state sanctioned and elite forms of medical practice The relationship is seen as both a historical as well as ongoing one Focusing on those who exist and practice in the shadow of statist medicine the book discusses the many ways in which they try to heal a range of maladies and how they experience their marginality The contributors also provide a history of such therapeutics in the process challenging the widespread belief that such traditional therapeutics are relatively static and unchanging In focusing on these problems of transition they open up one of the central concerns of subaltern historiography This is an important contribution to the history of medicine and society and subaltern and South Asian studies **Pye's**
