*Plasma Physics and Magnetohydrodynamics* Defense Documentation Center (U.S.),1962      **The Matrix and Tensor Quarterly** ,1971      **Service-Oriented Computing** Claus Pahl,Maja Vukovic,Jianwei Yin,Qi Yu,2018-11-06 This book constitutes the proceedings of the 16th International Conference on Service Oriented Computing ICSOC 2018 held in Hangzhou China in November 2018 The 63 full papers presented together with 3 keynotes in this volume were carefully reviewed and selected from numerous submissions The papers have been organized in the following topical sections Microservices Services and Processes Service Trust and Security Business Services and Processes Edge IoT Services Social and Interactive Services Recommendation Service Analytics Quality of Service Service Engineering Service Applications Service Management      **ADVANCED ENGINEERING MATHEMATICS** SASTRY, S. S.,2009-07-30 This is a sequel to the author's earlier books Engineering Mathematics Vols I and II both well received by the students and the academics As this book deals with advanced topics in engineering mathematics which undergraduate students in engineering and postgraduate students in mathematics and allied disciplines have to study as part of their course requirements the title of Advanced Engineering Mathematics has been considered more suitable This well organised and accessible text discusses in detail the advanced mathematical tools and techniques required for engineering problems The book begins with Fourier series and goes on to give an indepth analysis of Fourier transform Mellin transforms and Z transforms It then examines the partial differential equations with an emphasis on the method of separation of variables applied to the solution of initial boundary value problems involving the heat wave and Laplace equations Discrete mathematics and its applications are covered in a separate chapter as the subject has wide applications in computer science In addition the book presents some of the classical problems of the calculus of variations including the brachistochrone problem The text concludes with a discussion on tensor analysis which has important applications in the study of continuum mechanics theory of relativity and elasticity Intended primarily as a text for undergraduate students of engineering postgraduate students of mathematics M Sc and master of computer applications MCA the book would be of great benefit also to practising engineers Key Features The topics given are application oriented and are selected keeping in view their use in various engineering disciplines Exercises are provided at the end of each section to test the student's comprehension A large number of illustrative examples are given to help students understand the concepts better      **U.S. Government Research Reports** ,1961      iCity. Transformative Research for the Livable, Intelligent, and Sustainable City Volker Coors,Dirk Pietruschka,Berndt Zeitler,2022-10-16 This open access book presents the exciting research results of the BMBF funded project iCity carried out at University of Applied Science Stuttgart to help cities to become more liveable intelligent and sustainable to become a LIScity The research has been pursued with industry partners and NGOs from 2017 to 2020 A LIScity is increasingly digitally networked uses resources efficiently and implements intelligent mobility concepts It guarantees the supply of its grid bound infrastructure with a high

proportion of renewable energy Intelligent cities are increasingly human centered integrative and flexible thus placing the well being of the citizens at the center of developments to increase the quality of life The articles in this book cover research aimed to meet these criteria The book covers research in the fields of energy i e algorithms for heating and energy storage systems simulation programs for thermal local heating supply runtime optimization of combined heat and power CHP natural ventilation mobility i e charging distribution and deep learning innovative emission friendly mobility routing apps zero emission urban logistics augmented reality artificial intelligence for individual route planning mobility behavior information platforms i e 3DCity models in city planning sunny places visualization augmented reality for windy cities internet of things IoT monitoring to visualize device performance storing and visualizing dynamic energy data of smart cities and buildings and city planning i e sound insulation of sustainable facades and balconies multi camera mobile systems for inspection of tunnels building integrated photovoltaics BIPV as active facade elements common space the building envelopes potential in smart sustainable cities
