Foundations of Mathematics Carole Skinner, Judith Dancer, 2013-06-20 Foundations of Mathematics outlines seven strands of practice which underpin successful mathematical development in children aged 3-7. Early years mathematics specialists Carole and Judith draw on their experience of working with early years practitioners including consultants and advisers across the UK and internationally. The book is completely up to date and embeds the Revised Early Years Foundation Stage throughout the book. The book brims with multi sensory ideas that will trigger children's curiosity, measuring using sand, mousse hunting for buried treasure and building secret dens outdoors. There are activities that involve playing and exploring games to make learning active and experiences to develop creative and critical thinking. Alongside these practical experiences and activities are clear explanations of the reasoning behind the ideas with clear guidance on the role of the practitioner and Home Challenges to promote the engagement of families. The authors provide straightforward advice to support the development of a mathematically enriched learning environment and ideas to help children transfer learning into their own child initiated play to build a genuine and solid foundation for mathematics.

Soldiers of Misfortune Mark L. Lauck, 2025-12-29 Despite what scholars and scientists predicted throughout the ages the Earth ended with a whimper and not a bang. AI ruled mankind with an iron fist for two centuries. The Earth slowly crumbled through the actions of both AI and Mankind. It was a slow death as gleaming cities and ghettos met the same fate. Rich and poor died holding each other in terror. The end was near when mysterious gigantic vac vessels known as Arcs suddenly appeared and scooped up the desperate remains of Humanity. The mysterious benefactors were called the Gardae who took the remaining populations on a long journey known as the Diaspora Exodus. After the long journey billions of people were unceremoniously dropped off on seven Settled Worlds chosen by the Gardae. Linked by an alien communication system called The Elemental Link aka TEL the seven planets became viable and an artificial life form called the Gr'n was created to counter the massive loss of life and low birth rates. The enslaved Gr'n were classified OTH (Other Than Human) and were given no rights under Associatium laws. A central government was formed and the Associatium's mission was to eliminate Mankind's past mistakes in the name of progress. In the beginning two companies became dominant.

The Paradise Company and Asguard Inc Both are defined by their military might and industrial knowledge Their fierce competition cost thousands of lives among the Settled Worlds Not having learned their lessons on Earth Mankind has been doing the same things over and over again the same way and expected different results to only experience repeat failures at catastrophic levels That type of thinking has not changed and may condemn humans to the extinction that eluded them the first time Mankind has a chance to start over again but circumstances have radically changed through experience and technology Humans remain mired in past behavior despite great upheavals in their failed past A small group of people are fighting against the status quo and trying to find a means for people to move past their limited physical and mental limits Religion culture corruption and greed stand against them and crush any attempts to move past the status quo *Modeste Mignon* Honoré de Balzac,1899 **MODESTE MIGNON** CLARA BELL,1898 1999 Pushcart Prize Xxiii Bill
