The BP Book of Industrial Archaeology Neil Cossons, 1975 *The BP of Industrial Archaeology*, 1975 **The BP Book of Industrial Archaeology** Neil Cossons, 1993 An illustrated study of industrialization and its physical remains in Britain The book describes how the process affected the nation's whole culture and contains extensive references to surviving sites and structures which are illustrated and pinpointed in maps and a gazetteer **The BP book of industrial archaeology**, 1975 *Industrial Archaeology* Eleanor Casella, James Symonds, 2007-01-04 Eleanor Conlin Casella and James Symonds The essays in this book are adapted from papers presented at the 24 Annual Conference of the Theoretical Archaeology Group held at the University of Manchester in December 2002 The conference session An Industrial Revolution Future Directions for Industrial Archaeology was jointly devised by the editors and sponsored by English Heritage with the intention of gathering together leading industrial and historical archaeologists from around the world Speakers were asked to consider aspects of contemporary theory and practice as well as possible future directions for the study of industrialisation and industrial societies It perhaps fitting that this meeting was convened in Manchester which has a rich industrial heritage and has recently been proclaimed as the archetype city of the industrial revolution McNeil and George 2002 However just as Manchester is being transformed by regeneration shaking off many of the negative connotations associated with factory based industrial production and remaking itself as a 21 century city then so too is the archaeological study of industrialisation being transformed In the most recent overview of industrial archaeology in the UK Sir Neil Cossons cautioned that industrial archaeology risked becoming a one generation subject that stood on the edge of oblivion alongside the mid 20 century pursuit of folklife studies Cossons 2000 13 It is to be hoped that the papers in this volume demonstrate that this will not be the case **Twentieth Century Industrial Archaeology** Michael Stratton, Barrie Trinder, 2014-04-04 This book examines the industrial monuments of twentieth century Britain Each chapter takes a specific theme and examines it in the context of the buildings and structure of the twentieth century The authors are both leading experts in the field having written widely on various aspects of the subject In this new and comprehensive survey they respond to the growing interest in twentieth century architecture and industrial archaeology The book is well illustrated with superb and unique illustrations drawn from the archives of the Royal Commission on the Historical Monuments of England It will mark and celebrate the end of the century with a tribute to its remarkable built industrial heritage *The Industrial Heritage* Judith Alfrey, Tim Putnam, 2003-09-02 The Industrial Heritage is the first integrated approach to the assessment conservation interpretation financing and management of the complex heritage of industrial cultures It breaks new ground as the authors both active workers in the field suggest that concepts of heritage defined to deal with pre industrial cultures must be modified to deal with the very different demands presented by industrial objects and the societies which produced them The essence of this book is practicality offering examples of the real issues which confront those concerned with preserving and
