## **The Art of Science in the Canadian Justice System** David Milward, Charles Ferguson, 2017-04-07

Part autobiography, part thought piece, part references. The book takes an insightful look at the experience and cases of renowned paediatrician and forensic expert witness Dr Charles Ferguson. The book presents the interaction of science and law as it applies specifically to the Canadian courts but the justice process as a whole. Dr Ferguson's experience from a scientist and medical professional's perspective in dealing with lawyers, judges and the process of testifying in numerous court offers a unique glimpse into how the two worlds of science and law don't always mesh. In some cases the evidence is compelling and definitive. In others, far from it. Ultimately, the book presents the important role of the forensic expert and expert witness as a vital and deciding factor as the courtroom proceedings play out. The cases presented in the book are personally involved with and interesting. The conclusions and results arrived at by Dr Ferguson are well thought out and backed by his scientific expertise. The results and conclusions arrived at by the courts are often expected, sometimes surprising in specific cases, even controversial. Throughout all, Dr Ferguson casts an independent and sometimes critical eye on the process, presenting a compelling argument and heartfelt recommendation for science, objectivity and justice to be served based on truth. Insofar as the facts of the cases presented through evidence and the testimony provided within the judicial process, a fascinating read for university students, experts and witnesses, lawyers and judges, and anyone involved in the forensic process in the trying of criminal and civil cases.
