Shaw,1998 Set sail with this collection of stories of boating the Northeast's waterways from New Jersey to Canada Inland Passage takes readers on a tour of the natural history of the Northeast revealing how the waterways and waterfronts that make up these popular cruising grounds were formed. The stories also delve deeply into the history of how human ingenuity shaped the waters and the way of life along the coast and inland waters in times long forgotten. Additionally the book focuses on rare boats their owners and the many people from boatyards to museums who work to preserve them. Ride the waves with Shaw as he sails the major waterways from Cape May to Lake Ontario and the Thousand Islands on the Saint Lawrence River the mountain lakes of the Adirondacks the Erie Canal the Hudson River and Lake Champlain. Shaw takes readers on tours on and off shore above and below water. Without ever leaving your seat you'll shove off for the coasts many fascinating lighthouses museums bridges harbors inlets beaches and artificial reefs. You'll learn about New Jersey's disappearing and reappearing island and how New York Harbor was built. Hear tales from the marine police find out what a sand sucker is and voyage through the most dangerous inlet on the Jersey Shore. Inland Passage brings alive the cruising experience and the people and places that make the Northeast waters so special.

## **Museums and the Working Class**

Adele Chynoweth,2021-09-28 Museums and the Working Class is the first book to take an intersectional and international approach to the issues of economic diversity and class within the field of museum studies. Bringing together 16 contributors from eight countries this book has emerged from the significant global dialogue concerning museums obligation to be inclusive participate in meaningful engagement and advocate for social change. As part of the push for museums to be more accessible and inclusive museums have been challenged to critically examine their power relationships and how these are played out in what they collect whose stories they exhibit and who is made to feel welcome in their halls. This volume will further this professional and academic debate through the discussion of class. Contributions to the book will also reinforce the importance of the working class not only in collection and exhibition policy but also for the organisational psychology of institutions. Museums and the Working Class is essential reading for scholars and students of museum gallery and heritage studies cultural studies sociology labour studies and history. It will also serve as a source of honest and research led inspiration to practitioners working in museums galleries libraries archives and at heritage sites around the world.
