**Found in Translation - Genesis One** J. Roland Kent,2016-02-23 J R Kent has solved a 2 500 year old mystery that defies both religion and science Hidden in the thirty one verses of Genesis One is a message so powerful it could ultimately change the course of global events Our hi tech world is barely a century old and already life altering environmental terrorist political economic and health threats pose potentially dire consequences for our future However many of the ancient advanced civilizations such as the Egyptians the Greeks the Romans and the Mayans of Central America endured for thousands of years So what was their secret and how is it revealed in the Genesis verses Genesis One is an ancient creation account for the earth plants animals and humankind However when reading these verses they may seem bewildering and out of the natural order The premise of this book illustrates in startling detail that this amazing story in fact perfectly correlates with the theories of modern science There are several reasons why this mystery has not been revealed until now First an ancient author wrote this account in the original Hebrew language but the actual evolutionary sequence of the Earth that he so accurately revealed has been lost in translation by the many biblical versions that followed Second the discoveries of modern science now put us at a point in time when this correlation has now been found in translation This revelation then begs two questions How was this knowledge possible in ancient times and who wrote it

### **Shadow of Oz**

Wayne D. Rossiter,2015-10-21 In the century and a half since Darwin's Origin of Species there has been an ongoing and often vociferously argued conversation about our species place in creation and its relationship to a Creator A growing number of academic professionals see no conflict between Darwin's view of life and the Christian faith Dubbed theistic evolution this brand of Christianity holds that God has used processes like Darwinian evolution to achieve his creation But is that true Can Darwin's mechanism of natural selection acting on chance mutations be reconciled with God's intentionality in producing particular outcomes Does humanity represent the apex of his creation or just an erasable and ephemeral signpost along a path still being revealed Does theistic evolution permit God to intervene supernaturally in the workings of his creation Can we as humans be made in the image of God if we are just one of the millions of products of evolution Can we salvage concepts like freewill meaning purpose or an eternal soul within theistic evolution In this book Wayne Rossiter assess theistic evolution and whether or not it is consistent with Christianity and secular science His conclusion is that it bears little resemblance to classical Christianity and promotes a century old understanding of evolutionary theory Theistic evolution renders God a passive player in creation so far removed and undetectable that he resembles a mere shadow of the Creator described in Christianity
