The Caring Church Call For A Humane Christianity:

"And O'er Earth's Troubled, Angry Sea": The History of Christian Science in the United States Rolf Swensen, 2025-05-21

Christian Science is one of the most unique and controversial of American religions but there has never been a history of this influential metaphysical group best known for its healing through prayer Most attention has previously focused on the church's founder Mary Baker Eddy 1821-1910 This compilation of nine previously published scholarly articles buttressed by additional insight presented in the preface introduction and conclusion should lead to further investigation of this compelling topic This volume investigates the origins of the Christian Science movement illustrates how Eddy's students mainly women helped its rapid spread through healings how Eddy guided and restrained her students examines some denominational growing pains underscores how The Mother Church in Boston and Eddy's Church Manual evolved recounts dozens of testimonies of healing and shows how local or branch churches operated before and after Eddy's passing Contrary to previous assumptions the new Christian religion was surprisingly diverse with almost one half of the membership coming from the lower middle and working classes This vibrant church ultimately declined due to excessive centralization and insufficient utilization of the membership plus lack of social activities and the rise of medical science Recent efforts to revitalize the movement through embracing communities are continuing *And O'er Earth's Troubled Angry Sea The History of Christian Science in the United States* will appeal to Christian Scientists kindred spirits in the metaphysical world anyone interested in religion and those who read social history Each chapter is suitable for group discussions and for undergraduate or graduate classes **The Caring Church** Carl J. Welz, 1985 **Integrative Approaches to Psychology and Christianity, Fourth Edition** David N. Entwistle, 2021-11-03

Since the first edition of *Integrative Approaches to Psychology and Christianity* was published in 2004 this has become the standard textbook on the topic Now in its fully revised fourth edition Dr Entwistle's book elucidates historical philosophical and practical issues in the integration of psychology and Christianity As in previous editions the current text provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology includes scholarly reflection on the integration literature and surveys six models of possible relationships between psychology and Christianity ranging from those that are completely opposed to either religion or psychology to intermediate models that assert that some limited interaction between them is possible to viewpoints which suggest that a Christian worldview approach can be used to provide a context for exploring areas of overlapping interest between psychology and Christianity The current edition considers recent advances in both Catholic and Protestant thinking on integration including contemporary questions about what evangelicalism is and is not that shape evangelical reactions to the integration debate New content ranges from information about the contrasting views of Tertullian and Augustine to insights from contemporary psychology about factors that adversely affect the quality and reliability of human thinking to how conflict over COVID 19 has entered contemporary

religious debate The book is designed to help readers become aware of the presuppositional backdrops that each of us brings to these issues Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration This book is ideal as a textbook for students of psychology and other behavioral and social sciences social work sociology theology counseling pastoral counseling at both the graduate and undergraduate level It is also written for the broader readership of psychologists counselors pastors and others who are interested in integration
