**London and the Making of Provincial Literature** Joseph Rezek, 2015-07-10 In the early nineteenth century London publishers dominated the transatlantic book trade No one felt this more keenly than authors from Ireland Scotland and the United States who struggled to establish their own national literary traditions while publishing in the English metropolis Authors such as Maria Edgeworth Sydney Owenson Walter Scott Washington Irving and James Fenimore Cooper devised a range of strategies to transcend the national rivalries of the literary field By writing prefaces and footnotes addressed to a foreign audience revising texts specifically for London markets and celebrating national particularity provincial authors appealed to English readers with idealistic stories of cross cultural communion From within the messy and uneven marketplace for books Joseph Rezek argues provincial authors sought to exalt and purify literary exchange In so doing they helped shape the Romantic era belief that literature inhabits an autonomous sphere in society London and the Making of Provincial Literature tells an ambitious story about the mutual entanglement of the history of books and the history of aesthetics in the first three decades of the nineteenth century Situated between local literary scenes and a distant cultural capital enterprising provincial authors and publishers worked to maximize success in London and to burnish their reputations and build their industry at home Examining the production of books and the circulation of material texts between London and the provincial centers of Dublin Edinburgh and Philadelphia Rezek claims that the publishing vortex of London inspired a dynamic array of economic and aesthetic practices that shaped an era in literary history **Scientific**

**Investigation of Copies, Fakes and Forgeries** Paul T. Craddock, 2009 Scientific Investigation of Copies Fakes and Forgeries is a comprehensive guide to the technical and scientific study of the authenticity of a wide range of antiquities and artworks It is the first book to provide a full survey of the subject of forgery from a scientific basis examining a wide range of materials and techniques The demand for copies fakes and forgeries is driven by rising prices in an international marketplace The book examines the available new technologies and ever more sophisticated forging techniques looking at production and distribution of fraudulent artworks The subject is exemplified by numerous internationally based case studies some turning out not to be as conclusive as is sometimes believed The book is aimed at those who need to understand the available approaches to and methods of scientific and technical authentication be they curator collector conservator or scientist Book Jacket
