Muller, 2013-07-04 An illustrated feast for the eye and intellect Dutch Art explores developments in art art history art criticism and cultural history of the Netherlands from the artists workshops for the Utrecht Dom in 1475 to the latest movements of the 1990s it is lavishly illustrated with 147

Casey, 2002-01-01 You are here a map declares but of course you are not any more than you truly occupy the vantage point into which a landscape

painting puts you How maps and paintings figure and reconfigure space as well as our place in it is the subject of Edward S Casey s study an exploration of how we portray the world and its many places Casey s discussion ranges widely from Northern Sung landscape painting to nineteenth century American and British landscape painting and photography from prehistoric petroglyphs and medieval portolan charts to seventeenth century Dutch cartography and land survey maps of the American frontier From these culturally and historically diverse forays a theory of representation emerges Casey proposes that the representation of place in visual works be judged in terms not of resemblance but of reconnecting with an earth and world that are not the mere content of mind or language a reconnection that calls for the embodiment and implacement of the human subject Book jacket *Catalogue of Paintings* York City Art Gallery, 1896 **Giants of Delft** Robert D.

Huerta, 2003 In a widely researched and deeply considered book Huerta argues that Vermeer s use of the camera obscura and other instrumental adjuncts parallels van Leeuwenhoek s pursuit of the optical way and embodies a profound philosophical connection between these investigators Analyzing Vermeer s work Huerta shows that the artist s choices were the result of his personal response to contemporary scientific discoveries and the work of men such as van Leeuwenhoek Christiaan Huygens and Galileo Galilei Furthermore Huerta compares Vermeer s program of informed observation to the methods used by van Leeuwenhoek and other scientists to accumulate and analyze instrument mediated knowledge This approach enabled Vermeer to confront the same issues as natural philosophers regarding the interpretation of unfamiliar images presented by instrumental systems
