The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography
Great Western: Railway Gallery Laurence Waters, 2018-11-30 It could be argued that the Great Western or Gods Wonderful Railway was for many years the most famous railway in England Much of the railway that we see today was the work of one of the greatest engineers of his time Isambard Kingdom Brunel The company was also served by locomotive engineers such as Gooch Armstrong Churchward Collett and Hawksworth who produced a series of locomotives that were well designed elegant and powerful Serving many holiday resorts of the south west with trains such as The Cornish Riviera Express the publicity department exploited to great effect that the Great Western was the Holiday Line It is probably true to

say that in the years before the Second World War the company was producing some of the most effective publicity material in England Using previously unpublished material from the extensive Great Western Trust collection at Didcot Railway
